Introduction

The Presidential Award for Excellence in Mathematics and Science Teaching (PAEMST) program was established by the White House in 1983 to recognize outstanding mathematics and science teachers in the United States. Administered by the National Science Foundation (NSF) on behalf of the White House, the Presidential Awards are given to teachers who demonstrate:

- Subject-matter competence and sustained professional growth in science or mathematics and in the art of teaching;
- An understanding of how students learn science or mathematics;
- The ability to engage students in direct hands-on science inquiry or mathematics inquiry activities;
- The ability to foster curiosity and to generate excitement among students, colleagues, and parents about the uses of science and mathematics in everyday life;
- A conviction that all students can learn science and mathematics, and a sensitivity to the needs of all students' cultural, linguistic, learning, and social uniqueness;
- An understanding of the relationships of science and mathematics to each other and the interconnectedness of all subject matter;
- An experimental and innovative attitude in their approach to teaching; and
- Professional involvement and leadership.

Nominations are typically sent to the state department of education, which then sends an application packet to the nominees. A selection committee reviews the applications and picks the three state finalists for each award category, and then a national panel makes the final selection. Initially, Presidential Awards were restricted to secondary (grades 7–12) school teachers in the 50 states, District of Columbia, and Puerto Rico; with two science teachers and two mathematics teachers in each jurisdiction receiving awards each year. The program was expanded in 1986 to include U.S. territories and the Department of Defense Dependent Schools and in 1990 to include elementary (grades K–6) teachers.

Each awardee is given an expense-paid trip for two to Washington, DC to attend an awards ceremony, receive a presidential citation, meet with leaders in government and education, and attend a number of special receptions. In addition, each awardee's school receives a grant (originally \$5,000, later increased to \$7,500) to be used under the direction of the awardee to improve the local science or mathematics program. Activities supported by these grants have included field trips, curriculum development, purchase of laboratory and instructional materials, and professional development for teachers. Finally, awardees and their schools often receive gifts from private sector donors in honor of their achievement and contributions.

In 2000, Horizon Research, Inc. distributed surveys to a national probability sample of approximately 9,000 teachers in grades K–12 asking about teacher background and preparation, classroom practices, and professional activities. At the same time, questionnaires were sent to all teachers who had received the Presidential Award for Excellence in Mathematics and Science Teaching. The response rates were 74 percent for the national sample and 83 percent for the Presidential Awardees. An accompanying questionnaire was sent to each awardee asking about impacts of the award. A copy of each instrument is included in Appendix A.

Based on the selection criteria used in evaluating the nominees, and the resources and opportunities made available to the recipients, it was expected that the groups would differ in teaching experience, in subject matter background, in classroom practices, and in roles in the professional community. The purpose of this report is to provide information about the nature and extent of these differences and about impacts as reported by the awardees.¹ Part I provides demographic characteristics of the awardees and explores the impacts the award has had on them. Part II provides a number of comparisons between the awardees and the population of K–12 science and mathematics teachers in the United States. Throughout this report, any differences noted are statistically significant at the 0.05 probability level.

¹ The results of the national survey are reported in the *Report of the 2000 National Survey of Science and Mathematics Education* (Weiss, et. al, 2001).

Part I

Impacts of the Award

Each year since 1983, Presidential Awards for Excellence in Mathematics and Science Teaching have been given to recognize outstanding teaching in mathematics and science. Initially restricted to the secondary level, since 1990 elementary teachers have been included in the PAEMST program.

Table 1 provides basic demographic information about the population of the Presidential Awardees. Roughly two-thirds of awardees are female, and more than 90 percent are White. At the time of the survey, most had more than 20 years teaching experience.

Table 1
Characteristics of Presidential Awardees

Category	Percent of Awardees				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
Sex					
Female	69	84	48	94	66
Male	31	16	52	6	34
Race					
White	92	93	91	93	93
Asian	3	3	2	2	4
Hispanic or Latino	2	2	2	2	2
Black or African-American	2	2	1	3	1
American Indian or Alaskan Native	1	<1	<1	<1	1
Native Hawaiian or Other Pacific Islander	<1	<1	1	1	<1
Age					
≤ 30 years	<1	<1	0	0	0
31–40	6	9	4	7	6
41–50	33	37	29	43	29
51+ years	61	54	67	50	65
Experience					
0–2 years	<1	0	<1	1	<1
3–5	<1	<1	0	0	0
6–10	4	6	3	6	3
11–20	27	32	24	34	22
≥ 21 years	69	62	73	60	75

Where Are the Awardees Now?

One of the most important issues for the PAEMST program is what awardees do professionally after receiving the award, and in particular, whether the award results in an exodus from the classroom. Data provided by recipients suggest that the award is not viewed as “a ticket out” of the classroom. Roughly two-thirds of all awardees in each subject/grade-range category are still employed as classroom teachers. As of 2000, 11 percent of the awardees were retired.² Most of the remainder of the awardees continue to be employed in K–12 education. (See Table 2.)

Table 2
Current Occupations of Presidential Awardees

Occupation	Percent of Awardees				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
Employed as a K–12 classroom teacher, full or part-time	65	68	65	66	63
Employed in any other position	23	25	22	28	22
Retired	11	7	13	5	15
Currently not employed	<1	<1	<1	1	<1

Those who were no longer teaching were asked to provide information about their current occupations, to describe the key factors that led to their decision to leave the classroom, and to indicate if the award had contributed in any way to this decision. Table 3 provides a breakdown of the current occupations of those who have left the classroom, excluding those who have retired. Note that most of the awardees who no longer have direct classroom teaching responsibilities are still actively involved in K–12 education, e.g., as district-level science/mathematics supervisors, teachers on “special assignment” with school- or district-wide responsibilities, or principals.

² Secondary awardees are much more likely than their elementary counterparts to have retired, owing to the fact that the secondary award began in 1983, while the elementary award was not initiated until 1990.

Table 3
Occupations of Awardees Who
Are Employed Outside the Classroom

Occupation	Percent of Awardees*				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
Employed in K–12 education, but not as a classroom teacher	65	74	54	82	57
Employed as a district-level science supervisor	22	22	17	23	26
Employed as a teacher on special assignment	18	22	11	27	14
Employed as a school principal/assistant principal	13	17	11	16	9
Employed at the state/regional level	5	2	9	6	3
Employed as a gifted/talented resource teacher	2	4	2	2	<1
Employed as a guidance counselor	1	1	2	1	<1
Employed as a superintendent	1	<1	1	2	2
Employed in another K–12 education position	3	4	2	4	3
Employed in post-secondary education (e.g., college or university)	19	8	25	9	26
Employed outside of a formal education setting	17	18	21	9	17
Occupation directly affects K–12 education	15	16	19	7	15
Occupation does not directly affect K–12 education	2	2	2	2	2

* Only awardees who are currently employed, but no longer full- or part-time K–12 classroom teachers, were included in these analyses.

Awardees who were no longer teaching were also asked if the award contributed to their decision to leave the classroom and if they planned to return to teaching. Of those who have left the classroom, only about 1 in 5 indicated that the award contributed to their decision to leave. (See Table 4.) As noted above, the vast majority of those who have left (and have not retired) are still working in K–12 education. Interestingly, elementary science and mathematics awardees are more likely than their secondary counterparts to say the award played a role in their decision to leave the classroom.

Table 4
Award Contributed to
Decision to Leave the Classroom

Did Award Contribute to Decision to Leave?	Percent of Awardees				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
Yes	17	19	15	24	14

Awardees who have left the classroom were asked if they plan on returning to classroom teaching in the future. The likelihood of returning appears largely dependent on the awardees' current position. For example, of those currently employed as a teacher on special assignment, 62 percent anticipate returning to the classroom, compared to 34 percent of district-level supervisors, 29 percent of principals, and 27 percent of those in post-secondary education.

It is interesting to note that some awardees stressed that the validation of the award encouraged them to remain in teaching:

It encouraged me to keep trying to do my best, to excel, to not get discouraged at the incredibly difficult task of teaching in the public school system.

If I had not received this award, I would have left teaching for research in the industrial sector. The award gave me credibility that allowed me to implement a state-of-the-art, elementary science program in my district.

Specific Impacts

When asked about the types of impacts the award had on them, many awardees cited the following:

- Renewed enthusiasm for teaching;
- Allowed more opportunities for professional development;
- Increased opportunities to network with other teachers;
- Increased resources available for teaching; and
- Increased respect received from the school and community.

As can be seen in Table 5, ratings of impacts were quite similar across subjects and grade levels. The only exception was that elementary awardees were more likely than their secondary-level counterparts to indicate that the award increased resources available for teaching, possibly due to the fact that budgets for equipment and supplies tend to be smaller at the elementary level.

Table 5
Impact of the Award

Impact	Percent of Awardees*				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
It renewed my enthusiasm for teaching	79	83	79	80	77
It allowed more opportunities for my professional development	78	80	74	82	78
It increased my opportunities to network with other teachers	77	76	72	79	81
It increased resources available for my teaching	74	80	71	78	70
It increased the respect I received from the school and community	69	67	72	73	65
It increased the time spent away from my daily teaching assignment	20	15	18	25	21
It reduced the time that I had available for my teaching responsibilities	10	9	9	15	10

* Awardees responding with 4 or 5 on a five-point scale, where 1 was “Not at all” and 5 was “To a great extent.”

Another item on the questionnaire asked awardees to describe in their own words the impact the award had on them. While the item specified “the single” greatest impact, many of the awardees listed multiple impacts, typically talking about the opportunities the recognition had provided them and how much they have gained from those opportunities.

One of the most frequently cited impacts was increased “clout” following receipt of the award. The following responses were typical:

The recognition has given me more credibility with powerful political entities such as our school board. I now have more confidence that my judgment is likely to be good, and a more realistic view of who “award winning” teachers are and how they behave.

Finally, I “think” my opinion counts—at least I am given the opportunity as a reliable voice to speak about science and children K–12.

The PAEMST is like a “stamp of approval” within the professional community. It has given me a voice. Other science educators—and some politicians—are more eager to listen to my ideas and advice.

It has given me clout within the district and in my school. When I weigh-in on a subject I at least get listened to.

Many awardees pointed to increased appreciation of their beliefs, practice, and philosophy from colleagues, parents, students, and the local and professional community. For example:

The prestige associated with the award created a public confirmation (validation) that I was/am an excellent teacher, resulting in students and parents being more confident and responding in a positive fashion before and after entering my classroom. Students take responsibility for learning, parents are supportive, overall raised student expectations for themselves.

I am recognized by all educators in my city as an outstanding science teacher. It earned me the respect that teachers (who dedicate their lives to improving the education of America’s youth) so richly deserve.

Perhaps the greatest impact is that I feel deeply respected by my administrators.

Others talked about an increase in their own enthusiasm for their work.

[The award] re-ignited my love of teaching science, thereby making me better than ever.

It revolutionized my own teaching and totally revitalized me.

It has renewed my spirit in teaching and confirmed that my novel approaches to science education are acceptable.

The recognition for their current teaching practices led some awardees to become more self-reflective, and to work even harder to improve their teaching and their students’ learning. As several teachers described:

The award validated my philosophy for teaching math. It made me more aware of my teaching style and the learning styles of my students. The self-examination of my teaching methods was extremely valuable.

The Presidential Award was ultimate validation of what I continue to try to do for my students. It continues to encourage me to reach a little higher, to risk a little more, to give my students the best science education I am capable of giving them.

It reinforced my drive to develop new ways (radically new) to teach physics.

Because I have greater self-confidence after this outside affirmation, I have been far more willing to try new teaching approaches and professional development opportunities.

The recognition solidified the need to risk and renew my teaching philosophy. What are students learning—not what am I teaching.

In a few cases, awardees talked about the pressure they felt as a result of having received the PAEMST. Said one:

[I am] going crazy trying to be constantly innovative and creative. So much pressure to prove I deserve this award.

In many cases, the public credibility, the internal positive feelings, and the self-confidence generated by the PAEMST empowered awardees to pursue and accept responsibilities that enabled them to have a wide-ranging impact on mathematics and science education.

The greatest impact of the award has been the recognition of me by my colleagues, the school district, parents, and the community in general as a leader and expert in science education. This recognition has led to my being asked to take part in task forces for curriculum adoption, leadership conferences at the state level, and serving as a consultant for elementary teachers.

The Presidential Award led to other recognition by local, state, and national colleagues and agencies. It had a cascade effect. I was recognized by my district. As a result of local recognition, I've had the opportunity to work with state science educators, review chapters for a publisher, and teach a Science Methods class for a local university. At the most recent science fair I spoke with four science teachers that I've helped train—that's an amazing impact!

The award gave me the confidence to go forth with the beliefs I had at the time to bring about changes in mathematics at the elementary level for my district. I was inspired and excited so much so, that I then wanted to help teachers in my state, which I did and still continue to do so. Ten years have passed since receiving this award and I am just now starting to slow down (meaning that I turn down requests to do workshops or conference presentations). However, I'll never stop working in the field of education!

I have made hundreds of presentations, served as President of the state-level NCTM affiliate, chaired numerous committees, developed in-service training, developed and provided training and support for math teacher leaders, worked on many state level math standards projects, participated in several NSF grants, etc. The PAEMST gave me the confidence and credentials to be able to do this.

This award validated my devotion to teaching and what I have been doing daily in a classroom for 25 years. It has provided the motivation to work harder in reaching out to colleagues, parents, and students. Finally, it has encouraged me to play a significant part in encouraging all educators to provide for a standards based education in mathematics. My career has been greatly impacted by the number of opportunities the award has afforded me. I have served as a consultant at the state level in mathematics education, written test items for our state testing, been invited to participate in a number of activities, and served as a field reader for grants for the U.S. Department of Education. None of these things would have occurred had it not been for the PAESMT. I am truly appreciative of the program.

The data in Table 5 also suggest that the award is having very little of its potential negative impacts. Only 20 percent of awardees saw the award as increasing the time spent away from their daily teaching assignment to a large extent, and only about 10 percent perceived the award as reducing the time that was available for their teaching responsibilities.

Uses of the Monetary Award

Another item on the questionnaire asked awardees to indicate the ways in which they used the monetary component of the award. As shown in Table 6, the most frequent use of money is for awardees' own classrooms. However, the data also indicate that many awardees used the award funds for purchases to benefit both their own instruction and that of their school as a whole. Similarly, most awardees used some of the funds for the professional development of their colleagues, as well as some for their own professional development.

Table 6
How the Monetary Component of the Award Was Used

Use of Monetary Award	Percent of Awardees				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
Purchase materials for my classroom	82	86	83	86	77
Purchase technology for the school	79	73	82	67	85
Participate in professional development	74	76	68	82	76
Purchase materials for other classrooms	69	76	58	82	69
Plan and present professional development for colleagues	60	61	53	68	63
Provide additional activities for students (e.g., field trips, camps, special classroom projects)	44	63	48	35	34
Sponsor a colleague to participate in professional development	43	40	36	53	48
Extend the award's impact by combining it with other sources of funds	37	40	43	26	34
Provide materials for parents and the community (e.g., information packets, workshops, special presentations)	18	24	12	36	11
Offer scholarships or grants to students	9	9	11	3	9
Contribute to school maintenance/renovation efforts	4	9	3	4	3

The data in Table 6 suggest some differences between science and mathematics awardees in how they use the monetary award. First, science awardees are more likely to use the award to provide additional activities for students, perhaps because more of these opportunities exist in science (e.g., field trips, science camps) than in mathematics. Second, science awardees are more likely to extend the award's impact by combining it with other sources of funds, again perhaps because more opportunities exist than in mathematics. Finally, mathematics awardees are more likely than their science counterparts to sponsor a colleague to participate in professional development.

In the open-ended item discussed earlier, when asked to describe the overall impact of the award, roughly one-third of the awardees talked about the ways they were able to use the money. Some described how they had used the award to purchase materials for their own classrooms, as the following examples illustrate:

The monies awarded have allowed me to infuse technology into my everyday classroom setting via TI Graphing calculators and Mac software. The recognition and trip were great, but the money provided was the best part of the experience. I am a better teacher because of it, and I believe my students are way better off because of it.

[The] greatest impact was being able to use grant money to enhance science teaching for students. There were wonderful projects [and a] vast array of students benefited. We were able to study “fast plants,” build a classroom pond, and study animal habitats to a greater extent. It allowed for hands-on materials for the students.

I would say the greatest impact has been providing equipment for my students to use. We have stereoscopes and a computer to use for various projects such as forestry and fossil studies. The computer is used every day. I love watching their faces light up when they see something magnified.

The greatest impact was on the students. I was able to plan and create activities that would enhance student learning. These increased resources and supplies and materials gave the students a richer learning experience.

Others described how they were able to use the funds to enhance the instructional resources available for their schools:

The receivers of the benefits of the award were entirely the students and teachers at [our school] by purchasing their needs—calculators, software, materials, and supplies.

I believe the greatest impact has been what I have been able to provide for my students. I purchased tables for my classroom and a science classroom. I purchased technology (computer, calculators, probes, software, etc.) for my courses. The acquisition of an Ellison die cutter and a good selection of dies have impacted our entire school.

The greatest impact of receiving this award has been the ability to upgrade technology in my classroom and school, and the ability to purchase new science kits (FOSS) for my school.

The development of the outdoor classroom—Arboretum—gardens made a significant impact on the students involved in their creation. These areas have become a welcomed addition to the school. I am proud to have been able to use the money as seed-money to create this lasting memorial.

It is interesting to note that for some of the awardees, it was the flexibility in purchasing rather than the money itself that was of greatest import. For example:

The greatest impact of the Presidential Award is being able to purchase supplies and technology for my classroom without having to get approval from 4–5 individuals first.

The ability to purchase classroom materials immediately without consulting others.

A number of awardees talked about using the award money to support their own professional development and/or that of other teachers in their schools.

Financial resources enabled me to send teachers to workshops, and to provide materials needed to follow through in the classroom with the changes learned at workshops.

The financial incentive (\$7,500) allowed me to build and foster graphing calculator technology into the high school curriculum via teacher-supplied technology, in-service training.

The greatest impact of this award was being able to provide intensive training for teachers through providing a one-week class (funding from my grant combined with other resources) and my having additional opportunities to present in 15-hour professional development courses.

Recognition of the Award

Awardees were asked to indicate which of a variety of media were used to publicize their award. As can be seen in Table 7, awardees were most likely to be recognized in their local newspaper, followed by school or district publications. These two vehicles were by far the most common for publicizing the award, although just over one-third also received television coverage. There were no differences by level or subject of award in how awardees were recognized. Among those listed in the “other” category, recognition at a school board meeting was by far the most common.

Table 7
How the Award Was Publicized

Publicity of Award	Percent of Awardees				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
In a local newspaper article	92	93	91	92	91
In a school/district newsletter	69	74	68	73	66
On a television news program	36	34	38	38	36
In a radio news story	25	24	23	26	28
I received no local media recognition for winning the award	4	4	5	3	4
Other	12	11	10	14	13

Given the award’s stature, it is reasonable to expect that one outcome might be increased respect for the recipient, and as noted earlier, many awardees mentioned increased respect when asked about the impact of the award. The questionnaire also asked awardees to rate this impact with regard to four groups. Award recipients generally perceived the greatest impacts on respect to occur among the parents of their students; followed closely by their teaching colleagues, the local community, and their students. (See Table 8.)

Table 8
How the Award Impacted Respect from Various Groups

Award Led to Increased Respect From:	Percent of Awardees*				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
The parents of your students	61	66	63	68	54
Your teaching colleagues	56	55	55	58	56
The local community generally	52	55	56	50	49
Your students	50	52	57	44	46

* Awardees responding with 4 or 5 on a five-point scale, where 1 was “Not at all” and 5 was “To a great extent.”

It is interesting to note that a number of awardees mentioned respect from their family as a particularly salient impact. For example:

The greatest impact of receiving the Presidential Award for me personally is the change in my father’s attitude toward my teaching. Now he does not see teaching as a waste of my talents and education.

Respect from those outside education—especially family members (it wasn’t until we were entering the White House that my husband realized the significance of the award—and how important my job was).

Whenever an individual is singled out for an honor, the potential exists for resentment on the part of the individual’s peers. The data in Table 9 suggest that such reactions are rare in the case of the Presidential Award, and that to the contrary, awardees’ colleagues view the award as intended—a well-deserved recognition for excellent teaching. Half the awardees indicated their colleagues saw the award as reflecting the excellence of the school as a whole, and one-third suggested that others were inspired to apply for similar awards by the experience of the awardee.

Table 9
How the Award Was Viewed by Colleagues

Award Viewed As:	Percent of Awardees*				
	Total	Science		Mathematics	
		Elem.	Sec.	Elem.	Sec.
A well-deserved recognition of your excellence in teaching	75	73	74	76	77
A reflection of the excellence of the school as a whole	48	50	50	47	46
Inspiration to apply for the Presidential Award or similar awards themselves	35	35	39	31	32
A reward for simply being visible in the profession rather than excellent in teaching	11	9	11	12	11
Money that could have been better spent on other things	2	2	2	2	1

* Awardees responding with 4 or 5 on a five-point scale, where 1 was “Not at all” and 5 was “To a great extent.”

At the same time, there was some evidence of jealousy and resentment in responses to the open-ended question on the impact of the award. Some described jealous reactions on the part of other teachers, others poor treatment by school or district administrators. For example:

I feel it has earned me respect at the university level. In my school district, it only aroused jealousy.

[I have been] ostracized by the Science Department of my district.

I have been unfairly treated by central office administration, due to jealousy.

Among my colleagues I have received praise and encouragement. However, with the district for a host of reasons, the award has been greatly minimized. The current school administration views this award as a connection to the previous administration. For this reason, they seek to downplay it. What a shame they acted in such a petty manner.

Because I was not politically or professionally well connected, receiving the Presidential Award, I felt, was validation of my work and impact as a classroom teacher. I was very surprised at the negative reaction of members of my department. This reaction of my colleagues resulted in my focusing even more on my teaching and curtailing my involvement on committees and activities in the school and community.

Professional Involvement of the Awardees

To help identify the impacts of the award, respondents were given a list of activities in different areas and asked to indicate those in which they were involved five years preceding and five years following the award. To ensure a valid comparison, only those who held the award for at least five years prior to completing the questionnaire were included in the analysis.

One series of items asked about awardees' involvement in their school and district as a professional development provider and as a resource generally (e.g., serving on a textbook selection committee). Given that award criteria include these types of activities, it is not surprising that the majority of awardees were involved in them prior to receiving the award. These data are shown in Tables 10 and 11. The largest overall increases occurred in the activity where the smallest percentages of awardees were involved prior to the award—mentoring or coaching a new teacher.

Table 10
Science Awardee Involvement in
Professional Activities Before and After the Award

Activity	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
Serving as an informal resource in science to other teachers in your school or district	84	97	85	92
Providing workshops on science teaching to other teachers in your school or district	78	91	79	89
Serving on a school or district science curriculum committee	74	89	78	82
Supervising a student teacher	71	66	67	68
Serving as a grade-level/team leader*	64	68	42	47
Serving on a school or district science textbook selection committee	56	63	75	72
Serving as the science lead teacher or science department chair	51	63	57	64
A formal mentoring or coaching arrangement with a new teacher	37	50	36	52

* This item was written specifically for K–8 teachers. Data for secondary awardees should be interpreted with caution, as they include responses from teachers for whom this item may not have been appropriate.

Table 11
Mathematics Awardee Involvement in
Professional Activities Before and After the Award

Activity	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
Serving as an informal resource in mathematics to other teachers in your school or district	80	97	87	96
Providing workshops on mathematics teaching to other teachers in your school or district	79	91	79	89
Serving on a school or district mathematics curriculum committee	75	89	84	89
Supervising a student teacher	66	63	70	65
Serving on a school or district mathematics textbook selection committee	61	76	87	84
Serving as a grade-level/team leader*	56	66	53	56
A formal mentoring or coaching arrangement with a new teacher	37	52	39	52
Serving as the mathematics lead teacher or mathematics department chair	31	46	68	73

* This item was written specifically for K–8 teachers. Data for secondary awardees should be interpreted with caution, as they include responses from teachers for whom this item may not have been appropriate.

Another series of items asked about the awardees' involvement in professional organizations. As can be seen in Tables 12 and 13, five years after their award, virtually all awardees were involved in their primary organization (NSTA or NCTM) at the most basic level; i.e., they held membership. The award itself seemed to make a substantial difference among elementary recipients, who were less likely than their secondary counterparts to be members prior to the award. A similar pattern was evident for membership in state-level chapters of these organizations.

Table 12
Science Awardee Membership in
Professional Organizations Before and After the Award

Professional Organization	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
NSTA	71	98	88	94
State-level chapter of NSTA	68	85	81	81

Table 13

Professional Organizations Before and After the Award

Professional Organization	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
NCTM	79	98	96	98
State-level chapter of NCTM	72	90	93	96

As can be seen in Tables 14 and 15, most respondents reported attending conferences for their respective professional organizations both before and after receiving the award, and the majority in each category gave presentations as well. Nine in 10 awardees reported giving presentations at conferences after the award, a pre-post difference most noticeable among elementary awardees in both subjects. The most obvious change is in the level of involvement in organizing conferences, and again elementary awardees seem most affected in this regard. That two-thirds or more of respondents reported serving on an organizing committee after their award is evidence of their commitment to the profession.

Table 14
Science Awardee Involvement in
Professional Organizations Before and After the Award

Type of Involvement	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
Attended conferences	90	98	97	98
Presented at conferences	75	89	83	92
Served on organization committees	50	74	63	74

Table 15
Mathematics Awardee Involvement in
Professional Organizations Before and After the Award

	5 Years Before	5 Years After	5 Years Before	5 Years After
Attended conferences	89	98	98	99
Presented at conferences	71	91	81	92
Served on organization committees	51	71	67	80

A final series of items asked about awardees' involvement in activities related to science and mathematics education outside their school and district. Responses to these items indicate that the PAEMST program has mobilized a small army of science and mathematics education consultants, which is perhaps the most major program impact of all. As can be seen in Tables 16 and 17, the largest change in involvement relates to awardees reviewing applications for the PAEMST program. Other areas of involvement also showed gains, and are likely to have had a substantial impact on the field. For example, in the five years following receipt of their award, roughly two-thirds of the awardees were involved in state efforts to develop standards and competencies for students and teachers, compared to one-third prior to the award. Similarly, two-thirds reported working outside their own district on science and mathematics curriculum development and consulting with districts other than their own on issues related to science and mathematics education. Eight in 10 awardees taught in-service workshops and courses outside their district in the five years following their award, compared to only 1 in 2 prior to the award. Forty percent of all awardees (more secondary than elementary) reported lobbying their state legislators on issues related to science and mathematics education, compared to only 15 percent before their award.

Table 16
Science Awardee Involvement in Professional Activities
Outside the School District Before and After the Award

Type of Involvement	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
Taught in-service workshops or courses in science/science teaching outside of your district	54	81	61	84
Consulted on science education for other districts	33	63	36	64
Worked on science curriculum development outside of your district	32	65	36	65
Worked on state science competencies/standards for K-12 students and/or teachers	25	63	27	62
Spoke to state legislators about science education	12	38	19	46
Served on a state-level higher education review panel (e.g., reviewed Eisenhower proposals) or advisory boards	8	25	12	35
Reviewed PAEMST applications	5	67	7	68
Reviewed proposals for a federal agency (e.g., National Science Foundation, Department of Education, NASA)	5	21	10	37
Served on a national-level science education advisory board	4	18	6	22
Other	3	16	3	12

Table 17
Mathematics Awardee Involvement in Professional Activities
Outside the School District Before and After the Award

Type of Involvement	Percent of Awardees			
	Elementary		Secondary	
	5 Years Before	5 Years After	5 Years Before	5 Years After
Taught in-service workshops or courses in mathematics/mathematics teaching outside of your district	55	85	55	82
Consulted on mathematics education for other districts	31	66	35	65
Worked on mathematics curriculum development outside of your district	21	53	33	65
Worked on state mathematics competencies/standards for K–12 students and/or teachers	20	60	37	65
Spoke to state legislators about mathematics education	7	27	15	41
Reviewed PAEMST applications	3	68	8	70
Served on a state-level higher education review panel (e.g., reviewed Eisenhower proposals) or advisory boards	3	19	8	30
Served on a national-level mathematics education advisory board	2	11	6	17
Reviewed proposals for a federal agency (e.g., National Science Foundation, Department of Education, NASA)	1	14	4	23
Other	4	13	5	14

In their open-ended responses describing the single greatest impact of the award, respondents consistently pointed out how the award opened doors to just the kinds of involvement described above.

The recognition as an involved and dedicated math teacher throughout the state has probably had the greatest impact. Being a Presidential Award winner gives one an immediate credibility as an outstanding educator which opens doors on a state level that would be hard to open otherwise.

There is a great deal of respect from the community and I have had several opportunities to serve on state-wide committees. Overall, this award has opened up many doors in the teaching career and has given me a reason to work even harder.

Provided opportunity to reach out beyond my classroom, something I was ready to do, by giving me credibility/confidence. It was something that helped to “open doors.”

The recognition and opportunities afforded me as a result of this award had the greatest impact....This award opened doors to many opportunities.

If the higher levels of involvement reflected in the quantitative data are attributable to the award, the PAEMST program is responsible for a vast amount of advocacy and involvement on behalf of science and mathematics education that likely would not have occurred otherwise.

Part II

Comparison of Presidential Awardees with Science and Mathematics Teachers Nationally

One of the purposes of surveying the awardees was to be able to compare their backgrounds, attitudes, and teaching practices to those of teachers in the nation as a whole.

Table 18 shows the extent of teaching experience of Presidential Awardees and science and mathematics teachers nationally. It is clear that Presidential Awardees are a much more experienced group than the national teaching force. For example, in 2000, 70 percent of the elementary science Presidential Awardees had taught for at least 20 years, while only 30 percent of elementary science teachers nationally had that much experience. (The fact that none of the awardees was in the 0–4 years experience category reflects the requirement of five years K–12 teaching experience in science/mathematics for eligibility for these awards.)

Table 18
**Teaching Experience of Presidential Awardees and
the National Science and Mathematics Teaching Force**

Number of Years	Percent of Teachers							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
0–4 years	0	24	0	27	0	27	0	25
5–9 years	2	17	3	21	2	15	2	16
10–14 years	14	16	7	13	13	15	9	13
15–19 years	14	12	10	8	24	11	12	11
20+ years	70	30	81	31	62	31	77	36

To enable valid comparisons, the remaining tables in this monograph focus on teachers in each group with 10 or more years teaching experience. These analyses are based on 1,137 Presidential Awardees and 3,089 teachers nationally.³ (See Table 19.)

³ Only awardees still employed as full- or part-time teachers were included in these analyses.

Table 19
Number of Presidential Awardees and
Teachers Nationally Included in These Analyses

Grade and Subject	Number of Teachers	
	P.A.	Nat.
Grades K–6		
Science	229	467
Mathematics	209	549
Grades 7–12		
Science	340	943
Mathematics	359	1,130
TOTAL	1,137	3,089

Teacher Demographics

Nationally, roughly 9 out of 10 elementary teachers are female. While that holds true for Presidential Awardees in elementary mathematics, only about 8 out of 10 elementary science awardees are female. (See Table 20.) In terms of race/ethnicity, both the national teaching force and the Presidential Awardees are a predominately white group, including 90 percent or more in each subject/grade combination. African-American teachers are even less well-represented among Presidential Awardees than in the national teaching force. For example, while about 12 percent of the United States population is African-American, only 5 percent of the secondary mathematics teachers nationally and only 1 percent of the secondary mathematics awardees are African-American. Awardees are more likely than their national counterparts to have earned degrees beyond the bachelor’s. Finally, elementary awardees are quite a bit less likely than their national counterparts to teach in self-contained settings.

Table 20
Characteristics of Experienced
Science and Mathematics Teaching Force

Characteristic	Percent of Teachers

Teach in Self-Contained Setting	66	92	—	—	73	89	—	—

Teacher Preparation

Not surprisingly, Presidential Awardees are more likely than others to have extensive coursework in science and mathematics. For example, secondary science and mathematics awardees are more likely to have undergraduate majors in their field—80 percent in science compared to 65 percent nationally, and 65 percent in mathematics compared to 51 percent nationally.

Table 21
Undergraduate Majors of
Experienced Science and Mathematics Teachers

Major	Percent of Teachers*

Other Fields	10	9	6	8	8	7	4	9

* Excludes the roughly 10 percent of respondents who indicated they had undergraduate majors in three or more fields.

In science, there are large differences in the percentage of secondary awardees and secondary teachers in the nation as a whole who have completed each of a number of different college courses; the differences are most substantial in the physical sciences, especially in coursework in analytical chemistry, modern or quantum physics, and electricity and magnetism. Similarly, 91 percent of the awardees compared to 79 percent of teachers nationally completed courses on methods of teaching science. The percentage taking computer programming was also significantly higher for Presidential Awardees. (See Table 22.)

In mathematics, the differences are most notable in some of the more advanced courses, such as abstract algebra, advanced calculus, and discrete mathematics. Likewise, 59 percent of awardees compared to only 40 percent nationally completed courses on instructional uses of computers/other technologies. (See Table 23.)

Other computer science	33	25

Similarly, as can be seen in Table 24, elementary mathematics Presidential Awardees are more likely than their peers nationally to have taken such college courses as probability and statistics (43 percent versus 31 percent), geometry for teachers (42 percent versus 20 percent), and calculus (23 percent versus 10 percent).

Table 24
Grade K–6 Experienced Mathematics

Calculus	23	10

* Includes General methods of teaching, Methods of teaching mathematics, Instructional use of computers/other technologies, and Supervised student teaching in mathematics courses.

The National Science Teachers Association (NSTA) has recommended that for the preparation of elementary and middle school science teachers, in addition to course work in science education, “conceptual content should be balanced among life, earth/space, physical, and environmental science, including natural resources” (National Science Teachers Association, 1998). Using completion of a college course in life, earth, and physical science as a proxy for competency, Table 25 shows that 75 percent of the elementary science awardees, compared to only 55 percent nationally, meet those standards.

Table 25
Grade K–6 Experienced Science Teachers
Meeting NSTA Course-Background Standards

Course Background	Percent of Teachers	
	P.A.	Nat.
Coursework in each science discipline plus science education	75	55
Lack science education only	4	11
Lack one science discipline	15	21
Lack two science disciplines	5	8
Lack three science disciplines	0	5

Perhaps as a result of their more extensive coursework, Presidential Awardees tend to feel more prepared pedagogically than do their national counterparts. (See Table 26.) For example, 96 percent of elementary mathematics Presidential Awardees, compared to 66 percent of teachers nationally consider themselves well prepared to lead a class of students using investigative strategies. Even more striking is that 9 out of 10 elementary science awardees feel well prepared to involve parents in the science education of their children, compared to 5 out of 10 nationally. Whether it is providing deeper coverage of fewer science/mathematics concepts; making connections between science/mathematics and other disciplines; using calculators to demonstrate science/mathematics principles; or using the Internet in their science/mathematics teaching, Presidential Awardees are much more likely than the general teaching population to consider themselves at least fairly well prepared.

Teach students who have limited English proficiency	31	28	17	17	27	29	19	21

* Includes teachers responding "very well prepared" and "fairly well prepared."

Based on the results of a factor analysis, the items in Table 26 were combined into four pedagogical preparedness composite variables. (Definitions of all composite variables, descriptions of how they were created, and reliability information are included in Appendix B.) Each composite has a minimum possible score of 0 and a maximum possible score of 100. Table 27 presents the composite scores related to teachers' pedagogical preparedness by subject and grade range.

Table 27
Composite Scores of Experienced Science and
Mathematics Teachers' Pedagogical Preparedness

Subject and Grade	Mean Score							
	Preparedness to Use Standards-Based Teaching Practices		Preparedness to Teach Students from Diverse Backgrounds		Preparedness to Use Calculators/Computers		Preparedness to Use the Internet

Grades 7–12	86	78	83	76	66	51	64	46
Mathematics								
Grades K–6	91	74	84	78	65	51	44	22
Grades 7–12	83	70	78	74	80	64	45	29

Professional Development

A series of items asked respondents to think back to three years ago, and describe their needs for professional development at that time. Given the differences in preparedness reported above, it is not surprising that Presidential Awardees as a whole were less likely than teachers nationally to perceive a moderate or substantial need for professional development in several areas. (See Table 28.) Large differences exist between national secondary science and mathematics teachers and awardees in the perceived needs to learn how to use technology in science and mathematics instruction and how to use inquiry/investigation-oriented teaching strategies.

The differences are even more evident at the elementary level. For example, 57 percent of national elementary mathematics teachers perceived a moderate or substantial need to learn how to use inquiry/investigation-oriented teaching strategies, compared to 37 percent of the Presidential Awardees. Similarly, 69 percent of elementary science teachers nationally, compared to only 53 percent of awardees, reported a moderate or substantial need to deepen their own science content knowledge. In addition, the need to understand student thinking in science was higher for teachers nationally (58 percent versus 37 percent). In contrast, awardees in 3 of the 4 subject/grade groups were at least as likely as their national counterparts to perceive a need for professional development in how to assess student learning.

Table 28
Experienced Science and Mathematics Teachers Reporting That They Perceived a Moderate or Substantial Need for Professional Development Three Years Ago

Statement	Percent of Teachers							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Learning how to use technology in science/mathematics instruction	76	85	63	74	77	79	53	71
Deepening my own science/mathematics content knowledge	53	69	33	37	45	41	29	26
Learning how to assess student learning in science/mathematics	47	57	39	34	42	40	38	27
Learning how to teach science/mathematics in a class that includes students with special needs	41	53	55	56	44	51	58	50
Understanding student thinking in science/mathematics	37	58	36	37	40	41	34	31
Learning how to use inquiry/investigation-oriented teaching strategies	36	62	30	44	37	57	39	51

Although Presidential Awardees generally reported less of a need for professional development, they are, in fact, more likely to spend substantial amounts of time on in-service education in their field. For example, as can be seen in Table 29, roughly 8 out of 10 secondary Presidential Awardees reported spending more than 35 hours on in-service education in their field in the past three years, compared to only about 4 in 10 nationally.

Table 29
Time Spent by Experienced Teachers on In-Service Education in Science and Mathematics in Last Three Years

Number of Hours	Percent of Teachers							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
None	1	21	1	6	3	12	0	7
Less than 6 hours	4	25	3	5	3	22	2	6
6–15 hours	12	26	4	22	10	33	6	20
16–35 hours	20	17	12	23	15	17	11	23
More than 35 hours	64	10	80	45	69	16	81	43

Similarly, Presidential Awardees were much more likely to participate in each of a number of types of specific science- and mathematics-related professional development activities. (See Table 30.) More than 70 percent of the awardees in each group reported teaching an in-service workshop in their field, compared to less than 20 percent nationally. In addition, roughly 7 out of 10 Presidential Awardees in each group reported serving on a school or district curriculum committee for their field, compared to only 2 in 10 in grades K–6, and 5 in 10 in grades 7–12 for the national population.

Table 30
Experienced Teachers Participating in
Various Professional Activities in Last Twelve Months

Professional Activity	Percent of Teachers							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Taught any in-service workshops in science/mathematics or science/mathematics teaching	73	4	78	19	71	6	74	17
Served on a school or district science/mathematics curriculum committee	69	18	67	50	68	20	73	47
Received any local, state, or national grants or awards for science/mathematics teaching	50	3	54	15	32	2	38	7
Mentored another teacher as part of a formal arrangement that is recognized or supported by the school or district, not including supervision of student teachers	48	19	48	29	45	20	44	22
Served on a school or district science/mathematics textbook selection committee	38	17	46	41	46	20	57	47

Not surprisingly given their active involvement in professional development, Presidential Awardees are much more likely to be familiar with the National Research Council (NRC) *Standards* and the National Council of Teachers of Mathematics (NCTM) *Standards*. (See Tables 31 and 32.) In science at the elementary level, 48 percent of the awardees reported being “very familiar” with the NRC *Standards* compared to only 3 percent nationally.

Where nationally, only 12 percent of elementary mathematics teachers and 23 percent of secondary mathematics teachers reported being “very familiar” with the NCTM *Standards*, 81 percent of elementary awardees and 75 percent of secondary awardees indicated that level of awareness. Presidential Awardees across the board in science and mathematics were also much more likely to report strong agreement with their respective *Standards* and a great extent of implementation of the recommendations made by the *Standards* documents.

Table 33 shows the percentages of elementary science and mathematics teachers nationally reporting that they are very well-qualified to teach each of a number of subjects. Presidential Awardees were much more likely than teachers in the nation as a whole to indicate they felt very well-qualified to teach their discipline. For example, 70 percent of elementary science awardees compared to 30 percent nationally indicated they felt very well-qualified to teach life science, and 67 percent compared to 24 percent nationally felt very well-qualified to teach earth science. Likewise, 96 percent of mathematics awardees compared to 57 percent nationally felt very well-qualified to teach mathematics.

Table 33
Experienced Grade K–6 Science and Mathematics Teachers Reporting
That They Are Very Well-Qualified to Teach Each of a Number of Subjects

Subject	Percent of Teachers			
	Science		Mathematics	
	P.A.	Nat.	P.A.	Nat.
Life Science	70	30	34	37
Earth Science	67	24	30	30
Physical Science	53	14	23	25
Mathematics	74	70	96	57
Reading/Language Arts	70	79	76	81
Social Studies	64	56	43	57

Differences were much smaller in secondary science (Table 34), with the largest disparity in perceived qualifications occurring in physics and science process/inquiry skills. For instance, 83 percent of awardees reported they are very well-qualified to teach experimental design as part of the science process, compared to only 57 percent of teachers nationally.

Table 34
Experienced Grade 7–12 Science Teachers Reporting That They
Are Very Well-Qualified to Teach Each of a Number of Science Topics

Topic	Percent of Teachers	
	P.A.	Nat.
Earth science		
Earth's features and physical processes	30	33
The solar system and the universe	37	34
Climate and weather	26	29
Biology		
Structure and function of human systems	51	59

Modern physics (e.g., special relativity)	26	11
Environmental and resource issues		
Pollution, acid rain, global warming	53	48
Population, food supply and production	46	44
Science process/inquiry skills		
Formulating hypotheses, drawing conclusions, making generalizations	89	69
Experimental design	83	57
Describing, graphing, and interpreting data	90	67

The items in Table 34 were combined into seven content preparedness composite variables. Table 35 displays the mean content composite scores for all secondary awardees and national science teachers for those responsible for teaching that subject, and for those not teaching that subject. The fact that Presidential Awardees feel much more prepared in science content areas than their national peers is most apparent in the area of physical science and physics. Awardees who teach physical science are more likely to feel qualified to teach physical science topics than their national counterparts (with mean composite scores of 81 and 68, respectively). Likewise, awardees who teach physics are more likely to feel qualified to teach physics topics than teachers nationally (a mean score of 94 versus 78).

Table 35
Content Preparedness Composite Scores
of Experienced Grade 9–12 Science Teachers

Subject	Mean Score					
	All Teachers		Teach Subject		Do Not Teach Subject	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Chemistry	82	76	96	89	75	68
Earth Science	71	64	85	83	69	61
Biology/Life Science	70	71	90	84	57	59
Environmental Science	70	67	85	75	69	67
Physics	69	59	94	78	56	53
Physical Science	66	60	81	68	65	59
Integrated/General Science	64	62	67	64	63	61

Similarly, as can be seen in Table 36, a larger proportion of secondary mathematics Presidential Awardees perceive themselves as very well-qualified to teach a number of mathematics concepts. Differences are most marked in the use of technology in support of mathematics (60 percent versus 24 percent) and in the more advanced mathematics topics such as calculus (43 percent versus 18 percent), functions and pre-calculus (80 percent versus 51 percent), and topics from discrete mathematics (35 percent versus 13 percent).

Table 36
Experienced Grade 7–12 Mathematics Teachers Reporting That They
Are Very Well-Qualified to Teach Each of a Number of Mathematics Topics

Topic	Percent of Teachers	
	P.A.	Nat.
Numeration and number theory	74	76
Computation	89	92
Estimation	88	88
Measurement	88	87
Pre-Algebra	95	94
Algebra	95	87

Geometry and spatial sense	86	70
Functions and pre-calculus concepts	80	51
Data collection and analysis	69	48
Probability	56	47
Statistics	44	24
Topics from discrete mathematics	35	13
Mathematical structures	19	10
Calculus	43	18
Technology in support of mathematics	60	24

As was done with science, composite variables were created to measure mathematics teachers' feelings of preparedness to teach both general and advanced mathematics topics. Table 37 shows Presidential Awardees' and national teachers' scores on the mathematics content composites. While both awardees and their national peers feel well qualified to teach general mathematics topics (e.g., computation, numeration and number theory), awardees are much more likely to feel prepared to teach advanced mathematics topics (e.g., discrete mathematics, calculus). For example, awardees who do not teach any advanced courses are more likely to feel qualified in these topics than are comparable teachers in the nation (with mean scores of 70 and 51, respectively).

Table 37
Content Preparedness Composite Scores
of Experienced Grade 9–12 Mathematics Teachers

Mathematics	Mean Score					
	All Teachers		Teaching No Advanced Courses		Teaching One or More Advanced Courses	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
General Mathematics	93	91	97	90	93	91
Advanced Mathematics	74	59	70	51	75	63

Teacher Decisionmaking

As can be seen in Table 38, K–12 Presidential Awardees perceive themselves as having more control over curriculum and instructional decisions than do their peers nationally. Whether the decision at hand was determining course goals and objectives; selecting the content, topics, and skills to be taught; selecting textbooks/instructional programs; or even setting the pace for covering topics, Presidential Awardees were considerably more likely than other teachers to indicate that they had strong control over the decision.

Table 38
Classes Where Experienced Teachers Report Having Strong Control Over Various Curriculum and Instructional Decisions

Decision	Percent of Classes*							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Selecting teaching techniques	88	58	92	79	88	66	92	74
Determining the amount of homework to be assigned	79	69	90	79	74	68	92	79
Choosing tests for classroom assessment	78	55	87	78	71	42	90	77
Selecting the sequence in which topics are covered	71	48	80	62	72	40	75	54
Setting the pace for covering topics	70	47	79	61	73	48	75	50
Choosing criteria for grading students	69	51	81	69	62	46	83	67
Selecting other instructional materials (besides textbooks/instructional programs)	69	27	74	53	71	35	78	48
Determining course goals and objectives	43	10	58	42	35	12	53	28
Selecting content, topics, and skills to be taught	40	12	58	38	34	13	53	29
Selecting textbooks/instructional programs	34	9	57	41	31	9	54	28

* Teachers were given a five-point scale for each decision, with 1 labeled “no control” and 5 labeled “strong control.”

Based on the results of a factor analysis, the items in Table 38 were combined into two composite variables—Curriculum Control and Pedagogy Control. Each composite has a minimum possible score of 0 and a maximum possible score of 100. Table 39 displays the composite scores for science and mathematics classes by grade range, illustrating that Presidential Awardees across the board perceive much more control over decisions related to curriculum and pedagogy than do their national peers, especially in curriculum control at the K–6 level.

Table 39
Curriculum Control and Pedagogy Control Composite Scores for Science and Mathematics Classes Taught by Experienced Teachers

Subject and Grade	Mean Score			
	Curriculum Control		Pedagogy Control	
	P.A.	Nat.	P.A.	Nat.
Science Classes				
Grades K–6	73	52	91	84
Grades 7–12	85	74	96	92
Mathematics Classes				
Grades K–6	74	52	89	80
Grades 7–12	84	69	97	92

Science and Mathematics Teaching

Overall, the student composition of Presidential Awardees' classes is quite similar to that of science and mathematics classes nationally. As can be seen in Table 40, class sizes average roughly 22 students in each group.

Table 40
Composition of Science and
Mathematics Classes of Experienced Teachers

Class Composition	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Average Class Size (number of students)	23	22	23	22	21	23	21	22
Race/Ethnic Composition (percent of students)								
White	69	69	76	73	71	69	80	70
Black or African-American	16	14	7	12	14	16	7	13
Hispanic or Latino	6	12	7	10	8	10	6	10
Asian	5	3	7	3	3	3	5	4
American Indian or Alaskan Native	3	1	1	1	1	1	1	1
Native Hawaiian or Other Pacific Islander	1	1	1	1	3	0	2	1

While the demographics of their classes are fairly similar, Presidential Awardees have very different ideas than teachers in the nation as a whole about the objectives appropriate for science and mathematics instruction, and they use very different strategies to achieve their objectives. Science awardees are more likely than their national peers to emphasize increasing interest in science, developing science process/inquiry skills, learning to explain science ideas, and learning to evaluate arguments based on scientific evidence. In contrast, the general population of science teachers is more likely than the awardees to emphasize learning science terms and facts and preparing students for standardized tests. (See Table 41.)

Table 41
Science Classes of Experienced Teachers with
Heavy Emphasis on Various Instructional Objectives

Objective	Percent of Classes*			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Learn science process/inquiry skills	89	41	82	69
Increase students' interest in science	78	61	63	50
Learn basic science concepts	80	66	83	81
Learn how to communicate ideas in science effectively	57	24	55	40
Prepare for further study in science	45	27	48	50
Learn to evaluate arguments based on scientific evidence	37	10	43	28
Learn important terms and facts of science	31	41	34	49
Learn about the relationship between science, technology, and society	31	11	35	29
Learn about the applications of science in business and industry	16	4	20	17
Learn about the history and nature of science	16	8	16	12
Prepare for standardized tests	9	21	12	21

* Teachers were given a four-point scale for each objective, with 0 labeled “None”; 1, “Minimal Emphasis”; 2, “Moderate Emphasis”; and 3, “Heavy Emphasis.”

Table 42 presents means for composite variables related to objectives for science classes. Of the two sets of objectives, Science Content (e.g., learning basic science concepts, learning science process/inquiry skills) is emphasized more by awardees and national teachers across the board. Although receiving less of an emphasis, Nature of Science (e.g., learning to evaluate arguments based on scientific evidence, learning how to communicate ideas in science effectively) is more likely to be stressed at the secondary level, and more likely to be emphasized by elementary science awardees than by elementary science teachers nationally.

Table 42
Mean Composite Scores Related to Objectives
in Science Classes Taught by Experienced Teachers

Class Objective	Mean Score			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Science Content	84	77	85	85
Nature of Science	67	50	71	67

Table 43 shows the percentage of mathematics Presidential Awardees and mathematics teachers nationally who reported giving heavy emphasis to each of a number of instructional objectives. Awardees are more likely than their national peers to emphasize learning how mathematical ideas connect with one another, learning to explain ideas in mathematics effectively, and increasing interest in mathematics; while mathematics teachers nationally are more likely than awardees to emphasize learning mathematical algorithms/procedures, learning to perform computations with speed and accuracy, and preparing for standardized tests.

Table 43
Mathematics Classes of Experienced Teachers with
Heavy Emphasis on Various Instructional Objectives

Objective	Percent of Classes*			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Learn how to solve problems	97	84	85	77
Learn mathematical concepts	93	89	93	88
Learn to reason mathematically	95	73	89	76
Learn how mathematics ideas connect with one another	80	57	78	59
Learn to explain ideas in mathematics effectively	74	39	60	38
Increase students' interest in mathematics	71	55	50	32
Prepare for further study in mathematics	50	43	73	62
Understand the logical structure of mathematics	46	32	46	41
Develop students' computational skills	25	67	20	37
Learn mathematical algorithms/procedures	28	47	45	61
Prepare for standardized tests	16	39	14	29
Learn to perform computations with speed and accuracy	15	44	10	22
Learn how to apply mathematics in business and industry	11	11	18	17
Learn about the history and nature of mathematics	9	2	9	3

* Teachers were given a four-point scale for each objective, with 0 labeled “None”; 1, “Minimal Emphasis”; 2, “Moderate Emphasis”; and 3, “Heavy Emphasis.”

Differences between types of objectives among grade ranges are captured in the mean scores on three composite variables—Mathematics Reasoning, Basic Mathematics Skills, and Nature of Mathematics—as shown in Table 44. For both Presidential Awardees and national teachers, the greatest reported emphasis is on objectives related to mathematical reasoning—e.g., learning mathematical concepts. K–12 national teachers however, tend to have a greater emphasis on basic mathematics skills (e.g., developing computational skills) than do awardees.

Table 44
Mean Composite Scores Related to Objectives
in Mathematics Classes Taught by Experienced Teachers

Class Objective	Mean Score			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Mathematics Reasoning	97	91	95	91
Basic Mathematics Skills	59	77	51	65
Nature of Mathematics	63	55	69	62

Differences between awardees and the national population can also be seen in science and mathematics class activities. Students in Presidential Awardees' science classes are more likely than others to do hands-on science activities, work on extended science investigations or projects; design their own investigations; and record, represent, and/or analyze data. They are less likely to read a science textbook in class or answer textbook/worksheet questions. (See Table 45).

Table 45
Science Classes of Experienced Teachers Where Teachers Report that
Students Take Part in Various Instructional Activities at Least Once a Week

Activity	Percent of Classes			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Work in groups	95	63	89	81

Record, represent, and/or analyze data	78	32	81	62
Follow specific instructions in an activity or investigation	73	49	71	77
Write reflections	59	23	26	20
Use mathematics as a tool in problem-solving	51	28	64	49
Design or implement their <i>own</i> investigation	40	7	25	13
Read other (non-textbook) science-related material in class	34	42	19	23
Watch a science demonstration	37	32	49	45
Work on extended science investigations or projects	27	7	16	9
Participate in field work	25	6	9	4
Listen and take notes during presentation by teacher	25	21	68	77
Make formal presentations to the rest of the class	17	3	10	6
Use computers as a tool	15	6	28	15
Read from a science textbook in class	13	33	13	32
Prepare written science reports	16	6	40	26
Watch audiovisual presentations	13	20	22	25
Answer textbook or worksheet questions	14	32	50	66
Take field trips	10	5	1	3

Table 46 shows the percentage of teachers *never* using computers in their science instruction. Fifty-nine percent of secondary science teachers nationally reported students never collecting data using sensors or probes, compared to 30 percent of the awardees. In addition, 45 percent nationally compared to 28 percent of awardees reported never using the computer to demonstrate scientific principles. At the elementary level, both awardees and national elementary teachers tend to use computers for playing science learning games. However, it is more common for awardees than for other teachers to use the computer to do laboratory simulations and retrieve or exchange data.

Table 46
Science Classes of Experienced Teachers Where Teachers
Report that Students Never Use Computers to do Particular Activities

Activity	Percent of Classes			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Take a test or quiz	68	70	72	66
Collect data using sensors or probes	66	80	30	59
Do drill and practice	52	52	54	58
Solve problems using simulations	47	68	36	52
Do laboratory simulations	45	73	31	47
Demonstrate scientific principles	39	62	28	45
Retrieve or exchange data	36	64	26	44
Play science learning games	29	43	56	55

A summary of the data on teaching practice is provided by the composite variables listed in Table 47. A score of 100 is attained if an individual indicated s/he used each strategy in the composite every science lesson. Similarly a score of 0 indicates that none of the strategies in the composite were ever used. While the mean scores for the secondary awardees and their national peers are fairly comparable, there are substantial differences at the elementary level. The data indicate that the use of projects/extended investigations; laboratory activities; and computers are far more common teaching practices of Presidential Awardees than of the general population of elementary science teachers.

Table 47
Mean Scores for Teaching Practice Composite Variables
in Science Classes Taught by Experienced Teachers

Teaching Practice	Mean Score			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Use of Strategies to Develop Students’ Abilities to Communicate Ideas	82	70	74	70
Use of Laboratory Activities	81	61	75	71
Use of Traditional Teaching Practices	59	52	67	70
Use of Projects/Extended Investigations	47	28	42	36
Use of Computers	24	14	27	20

Table 48 shows that students in Presidential Awardees’ mathematics classes are more likely than others to work in groups; write reflections; engage in mathematical activities using concrete materials; record, represent, and/or analyze data; and design their own activity or investigation. They are less likely than classes nationally to practice routine computations/algorithms or, at the elementary level, answer textbook or worksheet questions.

Table 48
Mathematics Classes of Experienced Teachers Where Teachers Report that Students Take Part in Various Instructional Activities at Least Once a Week

Activity	Percent of Classes			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Engage in mathematical activities using concrete materials	96	77	49	28
Work in groups	91	70	87	56
Use mathematical concepts to interpret and solve applied problems	83	68	83	71
Follow specific instructions in an activity or investigation	72	74	74	74
Record, represent, and/or analyze data	66	47	54	37
Practice routine computations/algorithms	51	77	47	72
Review homework/worksheet assignments	55	77	84	93
Use calculators or computers for learning or practicing skills	48	36	83	79
Use calculators or computers to develop conceptual understanding	45	29	79	61
Write reflections	38	21	17	8
Answer textbook or worksheet questions	44	83	86	92
Read other (non-textbook) mathematics-related materials in class	32	23	13	9
Design their <i>own</i> activity or investigation	25	13	15	6
Use calculators or computers as a tool	31	15	65	35
Make formal presentations to the rest of the class	25	11	18	7
Listen and take notes during presentation by teacher	24	30	81	86
Work on extended mathematics investigations or projects	18	6	12	5
Read from a mathematics textbook in class	18	45	32	37

Likewise, secondary mathematics Presidential Awardees as a whole are more inclined than their peers to use calculators/computers to demonstrate mathematics principles, retrieve and exchange data, and solve problems using simulations. National teachers, on the other hand, are more likely to use those resources to do drill and practice, and at the elementary level, play mathematics learning games. (See Table 49.)

Table 49
Mathematics Classes Where Teachers Report that Students Use Calculators/Computers for Various Activities at Least Once a Week

Activity	Percent of Classes			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Play mathematics learning games	32	45	8	7
Demonstrate mathematics principles	31	24	71	52
Do drill and practice	20	38	35	53
Solve problems using simulations	13	12	24	14
Do simulations	13	11	25	10
Retrieve or exchange data	10	6	19	9
Take a test or quiz	8	16	65	60
Collect data using sensors or probes	8	3	11	4

Table 50 displays the means for composite variables related to mathematics teaching practice. As previously noted, the data suggest that national teachers are more inclined to use traditional teaching practices—lecture, doing worksheet/textbook problems, and practicing routine computations—than are Presidential Awardees. This is most apparent at the elementary level where the national mean score is 70 compared to the awardee mean score of 54. In contrast, secondary awardees are more likely to use calculators/computers for investigations than teachers in the national population (a mean score of 46 versus 32).

Table 50
Mean Scores for Teaching Practice Composite Variables
in Mathematics Classes Taught by Experienced Teachers

Teaching Practice	Mean Score			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Use of Strategies to Develop Students’ Abilities to Communicate Mathematics Ideas	86	73	80	69
Use of Traditional Teaching Practices	54	70	76	81
Use of Calculators/Computers for Developing Concepts and Skills	43	39	72	65
Use of Calculators/Computers for Investigations	37	27	46	32

Data about their “most recent lesson” support the general findings that Presidential Awardees in both science and mathematics are more likely to implement lessons that involve students in reform-oriented activities, such as doing hands-on/manipulative activities, working in small groups, and using computers and calculators. For example, as seen in Table 51, roughly 7 out of 10 lessons taught by awardees included students working in small groups in their most recent lesson, compared to roughly 5 out of 10 nationally. Similarly, 80 percent of lessons taught by elementary mathematics awardees involved students doing hands-on/manipulative activities, compared to 67 percent of lessons taught by teachers nationally. In contrast, national science and mathematics teachers are more likely to implement lessons that involve students completing textbook/worksheet problems.

Table 51
Science and Mathematics Classes of Experienced Teachers
Participating in Various Activities in the Most Recent Lesson

Activity	Percent of Classes							
	Science				Mathematics			
	Grades K-6		Grades 7-12		Grades K-6		Grades 7-12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Discussion	85	90	75	77	95	89	93	92
Students doing hands-on/manipulative activities	79	60	66	49	80	67	38	23
Students working in small groups	78	53	66	51	77	51	72	52
Lecture	27	60	45	65	40	66	69	85
Students reading about science/mathematics	21	40	13	27	21	19	18	18
Students completing textbook/worksheet problems	16	45	30	51	45	77	58	78
Students using other technologies (besides calculators or computers)	15	6	16	10	9	3	3	2
Students using calculators	10	1	35	24	37	14	80	73
Students using computers	8	6	19	9	15	8	9	3
Test or quiz	5	9	8	10	10	12	16	16

It is not at all surprising therefore, that classes taught by Presidential Awardees spend a greater percentage of science and mathematics instructional time working with hands-on manipulatives or laboratory materials. (See Table 52.) For example, lessons taught by national elementary science teachers spend an average of only 28 percent of the time using hands-on activities, while awardees' lessons spend roughly half of their time on such activities.

Table 52
Average Percentage of Experienced Teachers' Science and
Mathematics Class Time Spent on Different Types of Activities

Activity	Percent of Class Time

Individual students reading textbooks, completing worksheets, etc.	7	18	6	15	13	26	12	20
Other activities	4	4	7	5	6	3	8	6

Assessment practices of Presidential Awardees also differ greatly from those of their peers. (See Table 53.) In elementary science classes, awardees are more likely than other science teachers to use review of student portfolios, notebooks/journals, observation of class presentations, open-ended laboratory task, and long term-science projects. Science teachers nationally are more likely than awardees to assess students based on short-answer tests.

In mathematics, Presidential Awardees are more likely than other teachers to base assessment of student progress on open-ended tasks using defined criteria; tests requiring open-ended responses; student presentations of their work to the class; and long-term mathematics projects. In contrast, national teachers are more likely than awardees to use predominately short-answer tests, such as multiple choice or fill in the blanks.

Table 53
Science and Mathematics Classes of Experienced Teachers Where Teachers Report Assessing Students' Progress Using Various Methods at Least Monthly

	Percent of Classes							
	Science				Mathematics			
	Grades K-6		Grades 7-12		Grades K-6		Grades 7-12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Ask students questions during large group discussions	98	98	97	98	99	100	99	97
Observe students and ask questions as they work in small groups	98	91	97	96	100	96	96	87
Use assessments embedded in class activities to see if students are "getting it"	96	90	94	93	100	98	99	93
Observe students and ask questions as they work individually	93	90	96	93	98	99	95	96
Review student notebooks/journals	83	60	57	56	78	55	55	45
Grade student work on open-ended and/or laboratory tasks using defined criteria (e.g., a scoring rubric)	83	47	85	78	72	39	77	46
Have students present their work to the class	74	51	55	44	82	53	68	55
Give tests requiring open-ended responses (e.g., descriptions, explanations)	79	56	87	85	82	57	90	74
Conduct a pre-assessment to determine what students already know	74	50	47	48	74	68	40	45
Review student homework	74	64	91	96	79	88	96	98
Review student portfolios	55	42	31	28	61	41	28	20
Have students assess each other (peer evaluation)	55	22	38	30	46	34	36	25
Have students do long-term science/mathematics projects	45	19	34	25	45	17	37	19
Give predominantly short-answer tests (e.g., multiple choice, true/false, fill-in-the-blank)	35	57	59	79	33	59	29	48

These findings are summarized in the composite variables related to assessment practices; mean scores are presented in Table 54. Presidential Awardees, as a whole, use informal assessment strategies (e.g., using assessments embedded in class activities) and journals/portfolios more frequently than teachers in the nation as a whole, but the differences are most pronounced in science at the elementary level. Elementary awardees in both subjects use journals/portfolios quite a bit more than their national counterparts.

Table 54
Mean Scores for Assessment Practice Composite Variables

	Mean Score			
	Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.
Science Classes				
Use of Informal Assessment	81	71	76	72
Use of Journals/Portfolios	58	41	38	34
Mathematics Classes				
Use of Informal Assessment	87	83	83	77
Use of Journals/Portfolios	53	37	35	24

The vast majority of secondary science and mathematics classes, both Presidential Awardees' classes and those nationally, use commercially published textbooks/programs. (See Table 55.) Awardees are not very different from the national population in terms of the percentage of the textbook they attempt to cover. The most apparent difference can be seen in elementary mathematics where 79 percent of the national teachers, compared to 58 percent of the awardees, cover more than three-fourths of the textbook during the year.

Table 55
Science and Mathematics Classes of Experienced Teachers Using
Commercially-Published Textbooks/Programs and Percentage Covered During the Year

Textbook/Program Use and Coverage	Percent of Classes*							
	Science				Mathematics			
	Grades K–6		Grades 7–12		Grades K–6		Grades 7–12	
	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.	P.A.	Nat.
Use Commercially Published Textbooks/Programs	65	69	87	94	77	89	95	94
Percentage Covered During the Year*								
Less than 25 percent	24	6	5	5	2	1	1	0
25–49 percent	12	16	21	19	11	3	7	7
50–74 percent	31	33	39	34	28	17	20	30
75–90 percent	21	20	27	35	37	40	49	45
More than 90 percent	13	25	7	7	21	39	23	18

* Only classes using commercially published textbooks/programs were included in these analyses.

Tables 56, 57, and 58 provide data on equipment usage in Presidential Awardees' and national elementary and secondary science and mathematics classes. In elementary science, awardees are more likely than teachers nationally to report using laboratory facilities and such technologies as CD-ROM players, videodisc players, and four-function calculators.

Similarly, at the secondary level, science awardees are more likely than their national counterparts to report use of graphing and scientific calculators, and calculator/computer lab interfacing devices. Teachers nationally are much more likely to say they do not need these kinds of equipment. (See Table 58.)

The differences in equipment usage between mathematics Presidential Awardees and teachers nationally are similar to those in science. At both the elementary and secondary level, mathematics awardees are more likely than their national peers to use videotape players and CD-ROM players. Fifty-three percent of the elementary mathematics awardees reported using fraction calculators in their classes, compared to 16 percent nationally. In addition, nearly 7 out of 10 elementary mathematics awardees compared to 5 out of 10 national teachers use computers with Internet connection during instruction. At the secondary level, mathematics awardees are much more likely than others to use graphing calculators (91 percent versus 67 percent), and calculator/computer lab interfacing devices (53 percent versus 30 percent); while awardees are less likely than secondary mathematics teachers nationally to use four-function and fraction calculators.

Conclusion

The 2000 National Survey of Science and Mathematics Education included a component for recipients of the Presidential Award for Excellence in Mathematics and Science Teaching in order to gauge the impacts of the award. An important finding is that most awardees are still in the classroom, and the vast majority of those who are employed outside the classroom are still involved in K–12 education at the school or district level.

Recipients reported that the award renewed their enthusiasm for teaching; led to increased respect from their school and community; provided additional resources for their own teaching, as well as for science and mathematics teaching in their schools, more generally; and increased their opportunities for professional development and networking with other teachers. In response to an open-ended question concerning the single greatest impact of the award, recipients spoke eloquently about how the award had “opened doors” for them. A small number of awardees described negative impacts, either jealousy and resentment on the part of their peers or, in a few cases, the pressure they felt to prove they deserved the award.

A series of items about their professional involvement in the five years prior to receipt of the award and the five years after receipt of the award provided additional insight into the impacts of the Presidential Award program. While most recipients were active in the profession before the award, the extent of involvement after the award was greater still, with awardees more likely to present at conferences, teach in-service workshops, consult for other districts, and serve on state and national committees/advisory boards.

Awardees who are still in the classroom were asked to complete the same surveys administered to random samples of science and mathematics teachers nationally. Given the eligibility criteria and the process of selecting Presidential Awardees, some of the differences between awardees and the national population of science and mathematics teachers described in this report are to be expected. Presidential Awardees tend to be more highly educated; and as a consequence of the award, have more resources to devote to their teaching, and more opportunities to serve in leadership roles than their national peers.

At the same time, the differences in level of involvement in professional activities are extraordinary. Presidential Awardees were much more likely to be active professionally—whether serving on a school or district curriculum or textbook committee, receiving grants or awards for teaching, or providing professional development for others. For instance, 74 percent of the awardees, but only 29 percent of national teachers reported spending more than 35 hours on in-service science/mathematics education in the last three years. Presidential Awardees are also far more likely to be familiar with, and in strong agreement with, both the NRC and NCTM *Standards* documents.

These differences in professional activities and beliefs are reflected in differences in instructional objectives. In science, Presidential Awardees are more inclined to place a greater emphasis on objectives related to the nature of science (e.g., learning to evaluate arguments based on scientific evidence, and communicating ideas in science effectively) than their national peers.

Likewise in mathematics, awardees are much more likely than other teachers to emphasize objectives related to mathematics reasoning and the nature of mathematics. Teachers nationally tend to emphasize objectives related to basic mathematics skills such as learning computational skills, algorithms/procedures, and preparing for standardized tests.

The classroom pedagogical and assessment practices by which these instructional objectives are addressed result in further differences between Presidential Awardees and the national population. Presidential Awardees tend to use more investigative teaching strategies. Their classes are much more likely to work in small groups, use manipulative materials, and use technology. Likewise Presidential Awardees are more likely than others to use open-ended performance tasks, portfolios, or long-term projects in determining student progress and much less likely to use multiple choice and other objective tests. In contrast, national teachers are more apt to use traditional teaching practices where their students read a textbook in class or do drill and practice with worksheet problems.

In summary, the process of selecting Presidential Awardees seems to be effective in recognizing teachers whose backgrounds, professional involvement, and teaching objectives and styles are consistent with the recommendations of professional associations and state and national standards.

Mathematics Questionnaire (Teacher)

List of Course Titles

PAEMST Awardee Questionnaire: Science

PAEMST Awardee Questionnaire: Mathematics

2000 National Survey of Science and Mathematics Education

Science Questionnaire

You have been selected to answer questions about your science instruction. If you do not currently teach science, please call us toll-free at 1-800-937-8288.

How to Complete the Questionnaire

Most of the questions instruct you to "darken one" answer or "darken all that apply." For a few questions, you are asked to write in your answer on the line provided. Please use a #2 pencil or blue or black pen to complete this questionnaire. Darken ovals completely, but do not stray into adjacent ovals. Be sure to erase or white out completely any stray marks.

Class Selection

Part of the questionnaire (sections C and D) asks you to provide information about instruction in a particular class. If you teach science to more than one class, use the label at the right to determine the science class that has been randomly selected for you to answer about. (If your teaching schedule varies by day, use today's schedule, or if today is not a school day, use the most recent school day.)

If You Have Questions

If you have questions about the study or any items in the questionnaire, call us toll-free at 1-800-937-8288.

Each participating school will receive a voucher for \$50 worth of science and mathematics materials. The voucher will be augmented by \$15 for each responding teacher. In addition, each participating school will receive a copy of the study's results in the spring of 2001.

Thank you very much. Your participation is greatly appreciated. Please return the completed questionnaire to us in the postage-paid envelope:

A. Teacher Opinions

1. Please provide your opinion about each of the following statements.
(Darken one oval on each line.)

	Strongly Disagree	Disagree	No Opinion	Agree	Strongly Agree
a. Students learn science best in classes with students of similar abilities.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. The testing program in my state/district dictates what science content I teach.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. I enjoy teaching science.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. I consider myself a "master" science teacher.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. I have time during the regular school week to work with my colleagues on science curriculum and teaching.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. My colleagues and I regularly share ideas and materials related to science teaching.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Science teachers in this school regularly observe each other teaching classes as part of sharing and improving instructional strategies.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Most science teachers in this school contribute actively to making decisions about the science curriculum.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2a. How familiar are you with the *National Science Education Standards*, published by the National Research Council?
(Darken one oval.)

- Not at all familiar, SKIP TO QUESTION 3
- Somewhat familiar
- Fairly familiar
- Very familiar

2b. Please indicate the extent of your agreement with the overall vision of science education described in the *National Science Education Standards*. (Darken one oval.)

Strongly Disagree	Disagree	No Opinion	Agree	Strongly Agree
<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2c. To what extent have you implemented recommendations from the *National Science Education Standards* in your science teaching? (Darken one oval.)

Not at all	To a minimal extent	To a moderate extent	To a great extent
<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

B. Teacher Background

3. Please indicate how well prepared you currently feel to do each of the following in your science instruction. (Darken one oval on each line.)

	Not Adequately Prepared	Somewhat Prepared	Fairly Well Prepared	Very Well Prepared
a. Take students' prior understanding into account when planning curriculum and instruction	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Develop students' conceptual understanding of science	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Provide deeper coverage of fewer science concepts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Make connections between science and other disciplines	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Lead a class of students using investigative strategies	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question 3 continues on next page...

3. *continued...*

	Not Adequately Prepared	Somewhat Prepared	Fairly Well Prepared	Very Well Prepared
f. Manage a class of students engaged in hands-on/project-based work	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
g. Have students work in cooperative learning groups	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Listen/ask questions as students work in order to gauge their understanding	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Use the textbook as a resource rather than the primary instructional tool	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Teach groups that are heterogeneous in ability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Teach students who have limited English proficiency	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Recognize and respond to student cultural diversity	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Encourage students' interest in science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Encourage participation of females in science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Encourage participation of minorities in science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
p. Involve parents in the science education of their children	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
q. Use calculators/computers for drill and practice	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
r. Use calculators/computers for science learning games	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
s. Use calculators/computers to collect and/or analyze data	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
t. Use computers to demonstrate scientific principles	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
u. Use computers for laboratory simulations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
v. Use the Internet in your science teaching for general reference	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
w. Use the Internet in your science teaching for data acquisition	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
x. Use the Internet in your science teaching for collaborative projects with classes/individuals in other schools	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

4a. Do you have each of the following degrees?

Bachelors	<input type="radio"/>	Yes	<input type="radio"/>	No
Masters	<input type="radio"/>	Yes	<input type="radio"/>	No
Doctorate	<input type="radio"/>	Yes	<input type="radio"/>	No

4b. Please indicate the subject(s) for each of your degrees.
(Darken all that apply.)

	Bachelors	Masters	Doctorate
Biology/Life Science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Chemistry	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Earth/Space Science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Physics	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other science, please specify: _____	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Science Education (any science discipline)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mathematics/Mathematics Education	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

If you have never taken a course in the teaching of science, darken this oval and go to question 9.

9. What is the **total** amount of time you have spent on professional development in science or the teaching of science in the last 12 months? in the last 3 years? (Include attendance at professional meetings, workshops, and conferences, but **do not** include formal courses for which you received college credit or time you spent **providing** professional development for other teachers.) (Darken one oval in each column.)

<u>Hours of In-service Education</u>	Last 12 months	Last 3 years
None	<input type="radio"/>	<input type="radio"/>
Less than 6 hours	<input type="radio"/>	<input type="radio"/>
6-15 hours	<input type="radio"/>	<input type="radio"/>
16-35 hours	<input type="radio"/>	<input type="radio"/>
More than 35 hours	<input type="radio"/>	<input type="radio"/>

10. In the past **12 months**, have you: (Darken one oval on each line.)

a. Taught any in-service workshops in science or science teaching?	<input type="radio"/> Yes	<input type="radio"/> No
b. Mentored another teacher as part of a formal arrangement that is recognized or supported by the school or district, not including supervision of student teachers?	<input type="radio"/> Yes	<input type="radio"/> No
c. Received any local, state, or national grants or awards for science teaching?	<input type="radio"/> Yes	<input type="radio"/> No
d. Served on a school or district science curriculum committee?	<input type="radio"/> Yes	<input type="radio"/> No
e. Served on a school or district science textbook selection committee?	<input type="radio"/> Yes	<input type="radio"/> No

11. In the past **3 years**, have you participated in any of the following activities related to science or the teaching of science? (Darken one oval on each line.)

a. Taken a formal college/university science course. (Please do not include courses taken as part of your undergraduate degree.)	<input type="radio"/> Yes	<input type="radio"/> No
b. Taken a formal college/university course in the teaching of science. (Please do not include courses taken as part of your undergraduate degree.)	<input type="radio"/> Yes	<input type="radio"/> No
c. Observed other teachers teaching science as part of your own professional development (formal or informal).	<input type="radio"/> Yes	<input type="radio"/> No
d. Met with a local group of teachers on a regular basis to study/discuss science teaching issues.	<input type="radio"/> Yes	<input type="radio"/> No
e. Collaborated on science teaching issues with a group of teachers at a distance using telecommunications.	<input type="radio"/> Yes	<input type="radio"/> No
f. Served as a mentor and/or peer coach in science teaching, as part of a formal arrangement that is recognized or supported by the school or district. (Please do not include supervision of student teachers.)	<input type="radio"/> Yes	<input type="radio"/> No
g. Attended a workshop on science teaching.	<input type="radio"/> Yes	<input type="radio"/> No

10 19b. What is the calendar duration of this science class? (Darken one oval.)
 9
 8

- Ⓐ Year
- Ⓑ Semester
- Ⓒ Quarter

PLEASE DO NOT WRITE IN THIS AREA

[SERIAL]

20. Are students assigned to this class by level of ability? (Darken one oval.) Yes No

21. Which of the following best describes the ability of the students in this class relative to other students in this school? (Darken one oval.)

- Fairly homogeneous and low in ability
- Fairly homogeneous and average in ability
- Fairly homogeneous and high in ability
- Heterogeneous, with a mixture of two or more ability levels

22. Indicate if any of the students in this science class are **formally** classified as each of the following: (Darken all that apply.)

- Limited English Proficiency
- Learning Disabled
- Mentally Handicapped
- Physically Handicapped, please specify handicap(s): _____

23. Think about your plans for this science class for the entire course. How much emphasis will each of the following **student objectives** receive? (Darken one oval on each line.)

	None	Minimal Emphasis	Moderate Emphasis	Heavy Emphasis
a. Increase students' interest in science	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Learn basic science concepts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Learn important terms and facts of science	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Learn science process/inquiry skills	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Prepare for further study in science	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Learn to evaluate arguments based on scientific evidence	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Learn how to communicate ideas in science effectively	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Learn about the applications of science in business and industry	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Learn about the relationship between science, technology, and society	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Learn about the history and nature of science	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Prepare for standardized tests	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

24. About how often do **you** do each of the following in your science instruction? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all science lessons
a. Introduce content through formal presentations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Pose open-ended questions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Engage the whole class in discussions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Require students to supply evidence to support their claims	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Ask students to explain concepts to one another	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Ask students to consider alternative explanations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Allow students to work at their own pace	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Help students see connections between science and other disciplines	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Assign science homework	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Read and comment on the reflections students have written, e.g., in their journals	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

25. About how often do students in this science class take part in the following types of activities? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all science lessons
a. Listen and take notes during presentation by teacher	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Watch a science demonstration	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Work in groups	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Read from a science textbook in class	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Read other (non-textbook) science-related materials in class	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Do hands-on/laboratory science activities or investigations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Follow specific instructions in an activity or investigation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Design or implement their <i>own</i> investigation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Participate in field work	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Answer textbook or worksheet questions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Record, represent, and/or analyze data	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Write reflections (e.g., in a journal)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Prepare written science reports	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Make formal presentations to the rest of the class	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Work on extended science investigations or projects (a week or more in duration)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
p. Use computers as a tool (e.g., spreadsheets, data analysis)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
q. Use mathematics as a tool in problem-solving	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
r. Take field trips	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
s. Watch audiovisual presentations (e.g., videotapes, CD-ROMs, videodiscs, television programs, films, or filmstrips)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

26. About how often do students in this science class use **computers** to: (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all science lessons
a. Do drill and practice	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Demonstrate scientific principles	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Play science learning games	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Do laboratory simulations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Collect data using sensors or probes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Retrieve or exchange data	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Solve problems using simulations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Take a test or quiz	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

27. How often do you assess student progress in science in each of the following ways? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all science lessons
a. Conduct a pre-assessment to determine what students already know.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Observe students and ask questions as they work individually.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Observe students and ask questions as they work in small groups.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Ask students questions during large group discussions.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Use assessments embedded in class activities to see if students are "getting it"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Review student homework.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Review student notebooks/journals.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Review student portfolios.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question 27 continues on next page...

PLEASE DO NOT WRITE IN THIS AREA

[SERIAL]

27. continued...

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all science lessons
i. Have students do long-term science projects.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Have students present their work to the class.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Give predominantly short-answer tests (e.g., multiple choice, true/false, fill in the blank).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Give tests requiring open-ended responses (e.g., descriptions, explanations).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Grade student work on open-ended and/or laboratory tasks using defined criteria (e.g., a scoring rubric).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Have students assess each other (peer evaluation).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

28. For the following equipment, please indicate the extent to which each is available, whether or not each is needed, and the extent to which each is integrated in this science class.

	Not at all Available	Readily Available	Needed?	Never use in this course	Use in specific parts of this course	Fully integrated into this course
a. Overhead projector	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Videotape player	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Videodisc player	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. CD-ROM player	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Four-function calculators	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Fraction calculators	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Graphing calculators	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Scientific calculators	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Computers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Computers with Internet connection	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Calculator/computer lab interfacing devices	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Running water in labs/classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Electric outlets in labs/classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Gas for burners in labs/classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Hoods or air hoses in labs/classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

29. How much of your own money do you estimate you will spend for supplies for this science class this school year (or semester or quarter if not a full-year course)? (Please enter your answer as a 3-digit number rounded to the nearest dollar, i.e., enter \$25.19 as 025. Enter your answer in the spaces to the right, then darken the corresponding oval in each column.)

\$

35b. Approximately what percentage of this textbook/program will you "cover" in this course? (Darken one oval.)

< 25%
 25-49%
 50-74%
 75-90%
 >90%

35c. How would you rate the overall quality of this textbook/program? (Darken one oval.)

Very Poor
 Poor
 Fair
 Good
 Very Good
 Excellent

D. Your Most Recent Science Lesson in This Class

Questions 36-38 refer to the last time you taught science to this class. Do not be concerned if this lesson was not typical of instruction in this class. (Please enter your answers as 3-digit numbers, i.e., if 30 minutes, enter as 030. Enter your answers in the spaces provided, then darken the corresponding oval in each column.)

36a. How many minutes were allocated to the most recent science lesson? (Note: Teachers in departmentalized and other non-self-contained settings should answer for the entire length of the class period, even if there were interruptions.)

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

36b. Of these, how many minutes were spent on the following: (The sum of the numbers in 1.-6. below should equal your response in 36a.)

1. Daily routines, interruptions, and other non-instructional activities

2. Whole class lecture/discussions

3. Individual students reading textbooks, completing worksheets, etc.

4. Working with hands-on, manipulative, or laboratory materials

5. Non-laboratory small group work

6. Other

37. Which of the following activities took place during that science lesson? (Darken all that apply.)

- Lecture
- Discussion
- Students completing textbook/worksheet problems
- Students doing hands-on/laboratory activities
- Students reading about science
- Students working in small groups
- Students using calculators
- Students using computers
- Students using other technologies
- Test or quiz
- None of the above

38. Did that lesson take place on the most recent day you met with that class? Yes No

E. Demographic Information

39. Indicate your sex:

- Male
- Female

40. Are you: (Darken all that apply)

- American Indian or Alaskan Native
- Asian
- Black or African-American
- Hispanic or Latino
- Native Hawaiian or Other Pacific Islander
- White

41. In what year were you born? (Enter the last two digits of the year you were born; e.g., if you were born in 1959, enter 59.)

[SERIAL]

2000 National Survey of Science and Mathematics Education

Mathematics Questionnaire

You have been selected to answer questions about your mathematics instruction. If you do not currently teach mathematics, please call us toll-free at 1-800-937-8288.

How to Complete the Questionnaire

Most of the questions instruct you to "darken one" answer or "darken all that apply." For a few questions, you are asked to write in your answer on the line provided. Please use a #2 pencil or blue or black pen to complete this questionnaire. Darken ovals completely, but do not stray into adjacent ovals. Be sure to erase or white out completely any stray marks.

Class Selection

Part of the questionnaire (sections C and D) asks you to provide information about instruction in a particular class. If you teach mathematics to more than one class, use the label at the right to determine the mathematics class that has been randomly selected for you to answer about. (If your teaching schedule varies by day, use today's schedule, or if today is not a school day, use the most recent school day.)

If You Have Questions

If you have questions about the study or any items in the questionnaire, call us toll-free at 1-800-937-8288.

Each participating school will receive a voucher for \$50 worth of science and mathematics materials. The voucher will be augmented by \$15 for each responding teacher. In addition, each participating school will receive a copy of the study's results in the spring of 2001.

Thank you very much. Your participation is greatly appreciated. Please return the completed questionnaire to us in the postage-paid envelope:

A. Teacher Opinions

1. Please provide your opinion about each of the following statements.
(Darken one oval on each line.)

	Strongly Disagree	Disagree	No Opinion	Agree	Strongly Agree
a. Students learn mathematics best in classes with students of similar abilities.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. The testing program in my state/district dictates what mathematics content I teach.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. I enjoy teaching mathematics.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. I consider myself a "master" mathematics teacher.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. I have time during the regular school week to work with my colleagues on mathematics curriculum and teaching.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. My colleagues and I regularly share ideas and materials related to mathematics teaching.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Mathematics teachers in this school regularly observe each other teaching classes as part of sharing and improving instructional strategies.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Most mathematics teachers in this school contribute actively to making decisions about the mathematics curriculum.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2a. How familiar are you with the NCTM *Standards*? (Darken one oval.)

- Not at all familiar, SKIP TO QUESTION 3
- Somewhat familiar
- Fairly familiar
- Very familiar

2b. Please indicate the extent of your agreement with the overall vision of mathematics education described in the NCTM *Standards*. (Darken one oval.)

Strongly Disagree	Disagree	No Opinion	Agree	Strongly Agree
<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2c. To what extent have you implemented recommendations from the NCTM *Standards* in your mathematics teaching? (Darken one oval.)

Not at all	To a minimal extent	To a moderate extent	To a great extent
<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

B. Teacher Background

3. Please indicate how well prepared you currently feel to do each of the following in your mathematics instruction. (Darken one oval on each line.)

	Not Adequately Prepared	Somewhat Prepared	Fairly Well Prepared	Very Well Prepared
a. Take students' prior understanding into account when planning curriculum and instruction	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Develop students' conceptual understanding of mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Provide deeper coverage of fewer mathematics concepts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Make connections between mathematics and other disciplines	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Lead a class of students using investigative strategies	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Manage a class of students engaged in hands-on/project-based work	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Have students work in cooperative learning groups	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Listen/ask questions as students work in order to gauge their understanding	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Use the textbook as a resource rather than the primary instructional tool	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Teach groups that are heterogeneous in ability	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Teach students who have limited English proficiency	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Recognize and respond to student cultural diversity	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Encourage students' interest in mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Encourage participation of females in mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Encourage participation of minorities in mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question 3 continues on next page...

PLEASE DO NOT WRITE IN THIS AREA

[SERIAL]

3. *continued...*

	Not Adequately Prepared	Somewhat Prepared	Fairly Well Prepared	Very Well Prepared
p. Involve parents in the mathematics education of their children	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
q. Use calculators/computers for drill and practice	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
r. Use calculators/computers for mathematics learning games	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
s. Use calculators/computers to collect and/or analyze data	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
t. Use calculators/computers to demonstrate mathematics principles	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
u. Use calculators/computers for simulations and applications	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
v. Use the Internet in your mathematics teaching for general reference	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
w. Use the Internet in your mathematics teaching for data acquisition	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
x. Use the Internet in your mathematics teaching for collaborative projects with classes/individuals in other schools	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

4a. Do you have each of the following degrees?

Bachelors	<input type="radio"/>	Yes	<input type="radio"/>	No
Masters	<input type="radio"/>	Yes	<input type="radio"/>	No
Doctorate	<input type="radio"/>	Yes	<input type="radio"/>	No

4b. Please indicate the subject(s) for each of your degrees. (Darken all that apply.)

	Bachelors	Masters	Doctorate
Mathematics	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Computer Science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mathematics Education	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Science/Science Education	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Elementary Education	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other Education (e.g., History Education, Special Education)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other, please specify _____	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

5. Which of the following college courses have you completed? Include both semester hour and quarter hour courses, whether graduate or undergraduate level. Include courses for which you received college credit, even if you took the course in high school. (Darken all that apply.)

MATHEMATICS

- Mathematics for elementary school teachers
- Mathematics for middle school teachers
- Geometry for elementary/middle school teachers
- College algebra/trigonometry/elementary functions
- Calculus
- Advanced calculus
- Real analysis
- Differential equations
- Geometry
- Probability and statistics
- Abstract algebra
- Number theory
- Linear algebra
- Applications of mathematics/problem solving
- History of mathematics
- Discrete mathematics
- Other upper division mathematics

SCIENCES/COMPUTER SCIENCES

- Biological sciences
- Chemistry
- Physics
- Physical science
- Earth/space science
- Engineering (any)
- Computer programming
- Other computer science

EDUCATION

- General methods of teaching
- Methods of teaching mathematics
- Instructional uses of computers/other technologies
- Supervised student teaching in mathematics

- 63 6. For each of the following subject areas, indicate the number of college semester and quarter courses you have completed. Count each course you have taken, regardless of whether it was a graduate or undergraduate course. If your transcripts are not available, provide your best estimates.

	Semester Courses	Quarter Courses
58 a. Mathematics education	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
57 b. Calculus	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
56 c. Statistics	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
55 d. Advanced calculus	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
54 e. All other mathematics courses	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
53 f. Computer science	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9
52 g. Science	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9	<input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 9

- 48 7. Considering all of your undergraduate and graduate **mathematics** courses, approximately what percentage were completed at each of the following types of institutions? (Darken one oval on each line.)

	0%	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
44 a. Two-year college/community college/technical school	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
43 b. Four-year college/university	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- 39 8. In what year did you last take a formal course for college credit in: (Please enter your answers in the spaces provided, then darken the corresponding oval in each column.)

<p>36 a. Mathematics</p> <div style="border: 1px solid black; padding: 5px;"> <table border="1" style="width: 100%; text-align: center;"> <tr><td style="width: 30px;"> </td><td style="width: 30px;"> </td><td style="width: 30px;"> </td></tr> <tr><td><input type="radio"/>0</td><td><input type="radio"/>1</td><td><input type="radio"/>2</td></tr> <tr><td><input type="radio"/>3</td><td><input type="radio"/>4</td><td><input type="radio"/>5</td></tr> <tr><td><input type="radio"/>6</td><td><input type="radio"/>7</td><td><input type="radio"/>8</td></tr> <tr><td><input type="radio"/>9</td><td><input type="radio"/>0</td><td><input type="radio"/>1</td></tr> <tr><td><input type="radio"/>2</td><td><input type="radio"/>3</td><td><input type="radio"/>4</td></tr> <tr><td><input type="radio"/>5</td><td><input type="radio"/>6</td><td><input type="radio"/>7</td></tr> <tr><td><input type="radio"/>8</td><td><input type="radio"/>9</td><td><input type="radio"/>0</td></tr> <tr><td><input type="radio"/>1</td><td><input type="radio"/>2</td><td><input type="radio"/>3</td></tr> <tr><td><input type="radio"/>4</td><td><input type="radio"/>5</td><td><input type="radio"/>6</td></tr> <tr><td><input type="radio"/>7</td><td><input type="radio"/>8</td><td><input type="radio"/>9</td></tr> <tr><td><input type="radio"/>0</td><td><input type="radio"/>1</td><td><input type="radio"/>2</td></tr> <tr><td><input type="radio"/>3</td><td><input type="radio"/>4</td><td><input type="radio"/>5</td></tr> <tr><td><input type="radio"/>6</td><td><input type="radio"/>7</td><td><input type="radio"/>8</td></tr> <tr><td><input type="radio"/>9</td><td><input type="radio"/>0</td><td><input type="radio"/>1</td></tr> </table> </div>				<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9	<input type="radio"/> 0	<input type="radio"/> 1	<p>36 b. - 20 9. What is the **total** amount of time you have spent on professional development in mathematics or the teaching of mathematics in the last 12 months? in the last 3 years? (Include attendance at professional meetings, workshops, and conferences, but **do not** include formal courses for which you received college credit or time you spent **providing** professional development for other teachers.) (Darken one oval in each column.)

<u>Hours of In-service Education</u>	<u>Last 12 months</u>	<u>Last 3 years</u>
13 None	<input type="radio"/>	<input type="radio"/>
12 Less than 6 hours	<input type="radio"/>	<input type="radio"/>
11 6-15 hours	<input type="radio"/>	<input type="radio"/>
10 16-35 hours	<input type="radio"/>	<input type="radio"/>
9 More than 35 hours	<input type="radio"/>	<input type="radio"/>

10. In the past **12 months**, have you:
(Darken one oval on each line.)

- | | | |
|---|--------------------------------------|-------------------------------------|
| a. Taught any in-service workshops in mathematics or mathematics teaching? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| b. Mentored another teacher as part of a formal arrangement that is recognized or supported by the school or district, not including supervision of student teachers? | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| c. Received any local, state, or national grants or awards for mathematics teaching? | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| d. Served on a school or district mathematics curriculum committee? | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| e. Served on a school or district mathematics textbook selection committee? | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |

11. In the past **3 years**, have you participated in any of the following activities related to mathematics or the teaching of mathematics? (Darken one oval on each line.)

- | | | |
|--|--------------------------------------|-------------------------------------|
| a. Taken a formal college/university mathematics course. (Please do not include courses taken as part of your undergraduate degree.) | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| b. Taken a formal college/university course in the teaching of mathematics. (Please do not include courses taken as part of your undergraduate degree.) | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| c. Observed other teachers teaching mathematics as part of your own professional development (formal or informal). | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| d. Met with a local group of teachers to study/discuss mathematics teaching issues on a regular basis. | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| e. Collaborated on mathematics teaching issues with a group of teachers at a distance using telecommunications. | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| f. Served as a mentor and/or peer coach in mathematics teaching, as part of a formal arrangement that is recognized or supported by the school or district. (Please do not include supervision of student teachers.) | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| g. Attended a workshop on mathematics teaching. | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| h. Attended a national or state mathematics teacher association meeting. | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| i. Applied or applying for certification from the National Board for Professional Teaching Standards (NBPTS). | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
| j. Received certification from the National Board for Professional Teaching Standards (NBPTS). | <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |

Questions 12a-12c ask about your professional development in the last 3 years. If you have been teaching for fewer than 3 years, please answer for the time that you have been teaching.

12a. Think back to **3 years ago**. How would you rate your level of need for professional development in each of these areas *at that time*? (Darken one oval on each line.)

	<u>None Needed</u>	<u>Minor Need</u>	<u>Moderate Need</u>	<u>Substantial Need</u>
Deepening my own mathematics content knowledge	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Understanding student thinking in mathematics	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>
Learning how to use inquiry/investigation-oriented teaching strategies	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>
Learning how to use technology in mathematics instruction	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>
Learning how to assess student learning in mathematics	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>
Learning how to teach mathematics in a class that includes students with special needs	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>

63 12b. Considering all the professional development you have participated in **during the last 3 years**, how much was each of the
 62 following emphasized? (Darken one oval on each line.)

	Not at all				To a great extent
59	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
58	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
57	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
56					
55	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
54	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
53	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

49 12c. Considering all your professional development in the **last 3 years**, how would you rate its
 48 impact in each of these areas? (Darken one oval on each line.)

	Little or no impact	Confirmed what I was already doing	Caused me to change my teaching practices
45	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
44	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
43	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
42			
41	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
40	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
39	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
38	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

34 13a. Do you teach in a **self-contained class**? (i.e., you teach multiple subjects to the same class of students all or most of the day.)

- 32 Yes, CONTINUE WITH QUESTIONS 13b AND 13c
- 31 No, SKIP TO QUESTION 14

26 13b. **For teachers of self-contained classes:** Many teachers feel better qualified to teach some subject areas than others. How well
 25 qualified do you feel to teach each of the following subjects **at the grade level(s) you teach**, whether or not they are currently
 24 included in your curriculum? (Darken one oval on each line.)

	Not Well Qualified	Adequately Qualified	Very Well Qualified
21	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
20	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
19	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
18	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
17	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
16	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- 13c. **For teachers of self-contained classes:** We are interested in knowing how much time your students spend studying various subjects. In a typical week, how many days do you have lessons on each of the following subjects, and how many minutes long is an average lesson? (Please indicate "0" if you do not teach a particular subject to this class. Please enter your answer in the spaces provided, then darken the corresponding oval in each column. Enter the number of minutes as a 3-digit number; e.g., if 30 minutes, enter as 030.)

Mathematics		Science		Social Studies		Reading/Language Arts	
Days Per Week	Approximate Minutes Per Day	Days Per Week	Approximate Minutes Per Day	Days Per Week	Approximate Minutes Per Day	Days Per Week	Approximate Minutes Per Day
<input type="radio"/> 0	<input type="radio"/> 000	<input type="radio"/> 0	<input type="radio"/> 000	<input type="radio"/> 0	<input type="radio"/> 000	<input type="radio"/> 0	<input type="radio"/> 000

NOW GO TO SECTION C, PAGE 8.

14. Which of these categories best describes the way **your** classes at this school are organized? (Darken one oval.)

- a. **Departmentalized Instruction**—you teach subject matter courses (including mathematics, and perhaps other courses) to several different classes of students all or most of the day.
- b. **Elementary Enrichment Class**—you teach only mathematics in an elementary school.
- c. **Team Teaching**—you collaborate with one or more teachers in teaching multiple subjects to the same class of students; your assignment includes mathematics.

- 15a. **For teachers of non-self-contained classes:** Within mathematics, many teachers feel better qualified to teach some topics than others. How well qualified do you feel to teach each of the following topics **at the grade level(s) you teach**, whether or not they are currently included in your curriculum? (Darken one oval on each line.)

	Not Well Qualified	Adequately Qualified	Very Well Qualified
a. Numeration and number theory	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Computation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Estimation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Measurement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Pre-algebra	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Algebra	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Patterns and relationships	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Geometry and spacial sense	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Functions (including trigonometric functions) and pre-calculus concepts	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Data collection and analysis	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
k. Probability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Statistics (e.g., hypothesis tests, curve fitting and regression)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Topics from discrete mathematics (e.g., combinatorics, graph theory, recursion)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Mathematical structures (e.g., vector spaces, groups, rings, fields)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Calculus	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
p. Technology (calculators, computers) in support of mathematics	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

15b. **For teachers of non-self-contained classes:** For each class period you are currently teaching, regardless of the subject, give *course title*, the *code-number* from the enclosed blue "List of Course Titles" that best describes the content addressed in the class, and the *number of students* in the class. (Please enter your answers in the spaces provided, then darken the corresponding oval in each column. **If you teach more than one section of a course, record each section separately below.**)

- Note that if you have more than 39 students in any class, you will not be able to darken the ovals, but you should still write the number in the boxes.
- If you teach more than 6 classes per day, please provide the requested information for the additional classes on a separate sheet of paper.

Course Title			Course Title			Course Title

11 19b. What is the calendar duration of this mathematics class? (Darken one oval.)
 10
 9

- Year
- Semester
- Quarter

20. Are students assigned to this class by level of ability? (Darken one oval.) Yes No

21. Which of the following best describes the ability of the students in this class relative to other students in this school? (Darken one oval.)

- Fairly homogeneous and low in ability
- Fairly homogeneous and average in ability
- Fairly homogeneous and high in ability
- Heterogeneous, with a mixture of two or more ability levels

22. Indicate if any of the students in this mathematics class are **formally** classified as each of the following: (Darken all that apply.)

- Limited English Proficiency
- Learning Disabled
- Mentally Handicapped
- Physically Handicapped, please specify handicap(s): _____

23. Think about your plans for this mathematics class for the entire course. How much emphasis will each of the following **student objectives** receive? (Darken one oval on each line.)

	None	Minimal Emphasis	Moderate Emphasis	Heavy Emphasis
a. Increase students' interest in mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Learn mathematical concepts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
c. Learn mathematical algorithms/procedures	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
d. Develop students' computational skills	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
e. Learn how to solve problems	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
f. Learn to reason mathematically	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
g. Learn how mathematics ideas connect with one another	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
h. Prepare for further study in mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
i. Understand the logical structure of mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
j. Learn about the history and nature of mathematics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
k. Learn to explain ideas in mathematics effectively	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
l. Learn how to apply mathematics in business and industry	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
m. Learn to perform computations with speed and accuracy	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
n. Prepare for standardized tests	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

24. About how often do **you** do each of the following in your mathematics instruction? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all mathematics lessons
a. Introduce content through formal presentations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Pose open-ended questions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
c. Engage the whole class in discussions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
d. Require students to explain their reasoning when giving an answer	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
e. Ask students to explain concepts to one another	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
f. Ask students to consider alternative methods for solutions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
g. Ask students to use multiple representations (e.g., numeric, graphic, geometric, etc.)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
h. Allow students to work at their own pace	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
i. Help students see connections between mathematics and other disciplines	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
j. Assign mathematics homework	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
k. Read and comment on the reflections students have written, e.g., in their journals	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

25. About how often do students in this **mathematics** class take part in the following types of activities? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all mathematics lessons
a. Listen and take notes during presentation by teacher	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
b. Work in groups	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
c. Read from a mathematics textbook in class	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
d. Read other (non-textbook) mathematics-related materials in class	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
e. Engage in mathematical activities using concrete materials	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
f. Practice routine computations/algorithms	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
g. Review homework/worksheet assignments	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
h. Follow specific instructions in an activity or investigation	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
i. Design their <i>own</i> activity or investigation	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
j. Use mathematical concepts to interpret and solve applied problems	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
k. Answer textbook or worksheet questions	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
l. Record, represent, and/or analyze data	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
m. Write reflections (e.g., in a journal)	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
n. Make formal presentations to the rest of the class	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
o. Work on extended mathematics investigations or projects (a week or more in duration)	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
p. Use calculators or computers for learning or practicing skills	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
q. Use calculators or computers to develop conceptual understanding	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
r. Use calculators or computers as a tool (e.g., spreadsheets, data analysis)	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ

26. About how often do students in this mathematics class use **calculators/computers** to: (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all mathematics lessons
a. Do drill and practice	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
b. Demonstrate mathematics principles	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
c. Play mathematics learning games	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
d. Do simulations	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
e. Collect data using sensors or probes	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
f. Retrieve or exchange data	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
g. Solve problems using simulations	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
h. Take a test or quiz	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ

27. How often do you assess student progress in mathematics in each of the following ways? (Darken one oval on each line.)

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all mathematic lessons
a. Conduct a pre-assessment to determine what students already know.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
b. Observe students and ask questions as they work individually.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
c. Observe students and ask questions as they work in small groups.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
d. Ask students questions during large group discussions.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
e. Use assessments embedded in class activities to see if students are "getting it"	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
f. Review student homework.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
g. Review student notebooks/journals.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
h. Review student portfolios.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
i. Have students do long-term mathematics projects.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
j. Have students present their work to the class.	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ
k. Give predominantly short-answer tests (e.g., multiple choice, true/false, fill in the blank).	Ⓐ	Ⓑ	Ⓒ	Ⓓ	Ⓔ

Question 27 continues on next page...

27. *continued*

	Never	Rarely (e.g., a few times a year)	Sometimes (e.g., once or twice a month)	Often (e.g., once or twice a week)	All or almost all mathematics lessons
l. Give tests requiring open-ended responses (e.g., descriptions, explanations).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
m. Grade student work on open-ended and/or laboratory tasks using defined criteria (e.g., a scoring rubric).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
n. Have students assess each other (peer evaluation).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

28. For the following equipment, please indicate the extent to which each is available, whether or not each is needed, and the extent to which each is integrated in this mathematics class.

	Not at all Available	Readily Available	Needed?	Never use in this course	Use in specific parts of this course	Fully integrated into this course
a. Overhead projector	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
b. Videotape player	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

D. Your Most Recent Mathematics Lesson in This Class

Questions 36-38 refer to the last time you taught mathematics to this class. Do not be concerned if this lesson was not typical of instruction in this class. (Please enter your answers as 3-digit numbers, i.e., if 30 minutes, enter as 030. Enter your answers in the spaces provided, then darken the corresponding oval in each column.)

36a. How many minutes were allocated to the most recent mathematics lesson?
 Note: Teachers in departmentalized and other non-self-contained settings should answer for the entire length of the class period, even if there were interruptions.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

36b. Of these, how many minutes were spent on the following:
 (The sum of the numbers in 1.-6. below should equal your response in 36a.)

1. Daily routines, interruptions, and other non-instructional activities

2. Whole class lecture/discussions

3. Individual students reading textbooks, completing worksheets, etc.

4. Working with hands-on or manipulative materials

5. Non-manipulative small group work

6. Other

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

37. Which of the following activities took place during that mathematics lesson? (Darken all that apply.)

- Lecture
- Discussion
- Students completing textbook/worksheet problems
- Students doing hands-on/manipulative activities
- Students reading about mathematics
- Students working in small groups
- Students using calculators
- Students using computers
- Students using other technologies
- Test or quiz
- None of the above

38. Did that lesson take place on the most recent day you met with that class? Yes No

Rockville, MD 20850

THANK YOU!

LIST OF COURSE TITLES

A. SCIENCE COURSES

<u>CODE</u>	<u>Course Category</u>	<u>Sample Course Titles</u>
Grades K – 5		
100	Science, Grade K	
101	Science, Grade 1	
102	Science, Grade 2	
103	Science, Grade 3	
104	Science, Grade 4	
105	Science, Grade 5	
106	Other Elementary Science	
Grades 6 – 8		
108	Life Science	
109	Earth Science	
110	Physical Science	
111	General Science	
112	Integrated Science	
Grades 9 – 12		
<u>Biology</u>		
114	1st Year	Introductory Biology; Biology I; General Biology; College Prep Biology; Honors Biology
115	1st Year, Applied	Basic Biology; Applied Biology; Life Science; Biomedical Education; Animal Science; Horticulture; Biology Science; Health Science; Nutrition; Agriculture Science; Fundamentals of Biology
116	2nd Year, AP	Advanced Placement
117	2nd Year, Advanced	Biology II; Advanced Biology; College Biology; Physiology; Anatomy; Microbiology; Genetics; Cell Biology; Embryology; Molecular Biology; Invertebrate/Vertebrate Biology
118	2nd Year, Other	Zoology; Botany; Bio-Medical Careers; Field Biology; Marine Biology; Other Biological Sciences
<u>Chemistry</u>		
119	1st Year	Introductory Chemistry; Chemistry I; General Chemistry; Honors Chemistry
120	1st Year, Applied	Applied Chemistry; Consumer Chemistry; Technical Chemistry; Practical Chemistry
121	2nd Year, AP	Advanced Placement Chemistry
122	2nd Year, Advanced	Chemistry II; Advanced Chemistry; College Chemistry; Organic Chemistry; Inorganic Chemistry; Physical Chemistry; Biochemistry; Analytical Chemistry
<u>Physics</u>		
123	1st Year	Introductory Physics; Physics I; General Physics; Honors Physics;
124	1st Year, Applied	Applied Physics; Electronics; Radiation Physics; Practical Physics
125	2nd Year, AP	Advanced Placement Physics
126	2nd Year, Advanced	Physics II; Advanced Physics; College Physics; Nuclear Physics; Atomic Physics
127	Physical Science	Physical Science; Interaction of Matter and Energy; Applied Physical Science
<u>Earth Science</u>		
128	Astronomy*	* NOTE: A course that includes substantial content from two or more of the earth sciences should be listed under code 132, 133, or 134.
129	Geology*	
130	Meteorology*	
131	Oceanography/Marine Science*	
132	1st Year	Earth Science; Earth/Space Science; Honors Earth Science
133	1st Year, Applied	Applied Earth Science; Fundamentals of Earth Science; Soil Science
134	2nd Year, Advanced/Other	Advanced Earth Science; Earth Science II
<u>Other Science</u>		
135	General Science	General Science; Basic Science; Introductory Science; Investigations in Science
136	Environmental Science	Ecology; Environmental Science
137	Coordinated Science	Coordinated Science includes content from more than one science discipline, e.g., life and physical science, but keeps the disciplines separate
138	Integrated Science	Integrated Science includes content from the various science disciplines and blurs the distinctions among them
199	Other Science

Federally Approved Definitions for Race/Ethnicity Categories

American Indian or Alaskan Native. A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.

Asian. A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Black or African-American. A person having origins in any of the black racial groups of Africa.

Hispanic or Latino. A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

Native Hawaiian or Other Pacific Islander. A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

White. A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

PAEMST Awardee Questionnaire: Science

Instructions: Please use a #2 pencil, or a blue or black pen to complete this questionnaire. Darken ovals completely, but do not stray into adjacent ovals. Be sure to erase or white out completely any stray marks.

1. In what year did you receive your Presidential Award?

- | | | | | | |
|----------------------------|----------------------------|----------------------------|----------------------------|----------------------------|----------------------------|
| <input type="radio"/> 1983 | <input type="radio"/> 1986 | <input type="radio"/> 1989 | <input type="radio"/> 1992 | <input type="radio"/> 1995 | <input type="radio"/> 1998 |
| <input type="radio"/> 1984 | <input type="radio"/> 1987 | <input type="radio"/> 1990 | <input type="radio"/> 1993 | <input type="radio"/> 1996 | <input type="radio"/> 1999 |
| <input type="radio"/> 1985 | <input type="radio"/> 1988 | <input type="radio"/> 1991 | <input type="radio"/> 1994 | <input type="radio"/> 1997 | |

2. Which best describes your **current primary** occupation? (Darken one oval.)

- a. Retired
- b. Currently not employed
- c. Employed in post-secondary education (e.g., college or university)
- d. Employed in K-12 education:
 - i. Employed as a K-12 classroom teacher, full or part-time; **SKIP TO QUESTION 7**
 - ii. Employed as a teacher on special assignment (without regular teaching responsibilities)
 - iii. Employed as a school principal
 - iv. Employed as a district-level science supervisor
 - v. Employed in another K-12 education position, specify _____
- e. Employed outside of a formal education setting:
 - i. Occupation directly affects K-12 education
 - ii. Occupation does not directly affect K-12 education

If you selected d.i.(Employed as a K-12 classroom teacher, full or part-time), please skip to question 7. Otherwise, please proceed with question 3.

3. What is the last school year that you taught at the K-12 level?

- | | | | | | |
|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|
| <input type="radio"/> 1998-99 | <input type="radio"/> 1995-96 | <input type="radio"/> 1992-93 | <input type="radio"/> 1989-90 | <input type="radio"/> 1986-87 | <input type="radio"/> 1983-84 |
| <input type="radio"/> 1997-98 | <input type="radio"/> 1994-95 | <input type="radio"/> 1991-92 | <input type="radio"/> 1988-89 | <input type="radio"/> 1985-86 | |
| <input type="radio"/> 1996-97 | <input type="radio"/> 1993-94 | <input type="radio"/> 1990-91 | <input type="radio"/> 1987-88 | <input type="radio"/> 1984-85 | |

4. Briefly describe the key factors that contributed to your decision to leave the classroom. *Please avoid writing in the markings at the side of the page.*

5. Did the award contribute in any way to your decision to leave the classroom? Yes No

6. Do you have plans to return to classroom teaching? Yes No

63 7. To what extent did receipt of the award impact you in each of the following ways?
 62 (Darken one oval on each line.)

61 Not at all To a great extent

- | | | | | | | |
|----|--|---|---|---|---|---|
| 60 | a. It increased resources available for my teaching | ① | ② | ③ | ④ | ⑤ |
| 59 | b. It increased my opportunities to network with other teachers | ① | ② | ③ | ④ | ⑤ |
| 58 | c. It allowed more opportunities for my professional development | ① | ② | ③ | ④ | ⑤ |
| 57 | d. It increased the time spent away from my daily teaching assignment | ① | ② | ③ | ④ | ⑤ |
| 56 | e. It renewed my enthusiasm for teaching | ① | ② | ③ | ④ | ⑤ |
| 55 | f. It increased the respect I received from the school and community | ① | ② | ③ | ④ | ⑤ |
| 54 | g. It reduced the time that I had available for my teaching responsibilities | ① | ② | ③ | ④ | ⑤ |

51 8. The monetary award allowed me to: (Darken all that apply.)

- 49 a. Purchase technology for the school
- 48 b. Plan and present professional development for colleagues
- 47 c. Participate in professional development
- 46 d. Sponsor a colleague to participate in professional development
- 45 e. Purchase materials for my classroom
- 44 f. Purchase materials for other classrooms
- 43 g. Offer scholarships or grants to students
- 42 h. Provide materials for parents and the community (e.g., information packets, workshops, special presentations)
- 41 i. Contribute to school maintenance/renovation efforts
- 40 j. Provide additional activities for students (e.g., field trips, camps, special classroom projects)
- 39 k. Extend the award's impact by combining it with other sources of funds
- 38 l. Other, please specify _____

35 9. In what ways, if any, was your award recognized by the local media? (Darken all that apply.)

- 34 a. On a television news program
- 33 b. In a radio news story
- 32 c. In a local newspaper article
- 31 d. In a school/district newsletter
- 30 e. I received no local media recognition for winning the award.
- 29 f. Other, please specify _____

25 10. Overall, to what extent has the award led to increased respect for you from:
 24 (Darken one oval on each line.)

23 Not at all To a great extent

- | | | | | | | |
|----|----------------------------------|---|---|---|---|---|
| 22 | a. Your teaching colleagues | ① | ② | ③ | ④ | ⑤ |
| 21 | b. Your students | ① | ② | ③ | ④ | ⑤ |
| 20 | c. The parents of your students | ① | ② | ③ | ④ | ⑤ |
| 19 | d. The local community generally | ① | ② | ③ | ④ | ⑤ |

16 11. In the past, awardees have reported a wide variety of responses from their colleagues. To what extent did your teaching
 15 colleagues view your receipt of the award as: (Darken one oval on each line.)

14 Not at all To a great extent

- | | | | | | | |
|----|--|---|---|---|---|---|
| 13 | a. A well-deserved recognition of your excellence in teaching | ① | ② | ③ | ④ | ⑤ |
| 12 | b. A reward for simply being visible in the profession rather than excellent in teaching | ① | ② | ③ | ④ | ⑤ |
| 11 | c. Inspiration to apply for the Presidential Award or similar awards themselves | ① | ② | ③ | ④ | ⑤ |
| 10 | d. Money that could have been better spent on other things | ① | ② | ③ | ④ | ⑤ |
| 9 | e. A reflection of the excellence of the school as a whole | ① | ② | ③ | ④ | ⑤ |

12. Which of the following activities were you engaged in during the specified times? (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. Supervising a student teacher	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. A formal mentoring or coaching arrangement with a new teacher	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. Serving as a grade-level/team leader	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
d. Serving as an informal resource in science to other teachers in your school or district	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
e. Providing workshops on science teaching to other teachers in your school or district	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
f. Serving on a school or district science curriculum committee	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
g. Serving on a school or district science textbook selection committee	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
h. Serving as the science lead teacher or science department chair	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

13. Indicate the professional organizations you were a member of during the specified times. (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. NSTA	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. State-level chapter of NSTA	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. NABT	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
d. ACS	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
e. AAPT	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
f. State-level chapter of AAPT	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
g. Other science-related professional organization(s), please specify: _____	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

14. Indicate the roles you have played in one or more of these professional organizations during the specified times. (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. Attended conferences	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. Served on organization committees	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. Presented at conferences	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

15. Which of the following have occurred during the specified times? (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. I am pursuing or have received another academic degree	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. I am writing or have written a teaching-related journal article	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. I have been involved in writing a teaching-related book or textbook	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
d. I have hosted a radio or television program related to teaching	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
e. I have been involved in grant-writing or securing funds for education	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
f. I have been offered a job in the private sector	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
g. I am teaching/have taught undergraduate/graduate courses at a college or university	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

16. Which of the following activities were you involved in during the specified times? Consider only activities related to science education. (Darken one oval on each line in each column.)

	In the five years prior to the receipt of the award		Within the first five years after receiving the award	
a. Worked on any of the following NSF-funded initiatives				
i. Statewide Systemic Initiative (SSI)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
ii. Urban Systemic Initiative (USI)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
iii. Urban Systemic Program (USP)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
iv. Local Systemic Change (LSC)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
v. Rural Systemic Initiative (RSI)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
vi. Instructional materials development project	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
b. Reviewed PAEMST applications	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
c. Worked on science curriculum development outside of your district	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
d. Consulted on science education for other districts	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
e. Taught in-service workshops or courses in science/science teaching outside of your district	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
f. Worked on state science competencies/standards for K-12 students and/or teachers	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
g. Spoke to state legislators about science education	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
h. Served on a state-level higher education review panel (e.g., reviewed Eisenhower proposals) or advisory boards	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
i. Reviewed proposals for a federal agency (e.g., National Science Foundation, Department of Education, NASA)	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
j. Served on a national-level science education advisory board	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>
k. Other, please specify _____	<input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	<input type="radio"/>

17. Please write your current email address here: _____

18. Looking back, what has been the overall greatest impact of your receiving this award? *Please avoid writing in the markings at the side of the page.*

Please make a photocopy of this questionnaire and keep it in case the original is lost in the mail. Please return the original to:

2000 National Survey of Science and Mathematics Education
Westat
1650 Research Blvd.
TB120F
Rockville, MD 20850

PAEMST Awardee Questionnaire: Mathematics

Instructions: Please use a #2 pencil, or a blue or black pen to complete this questionnaire. Darken ovals completely, but do not stray into adjacent ovals. Be sure to erase or white out completely any stray marks.

1. In what year did you receive your Presidential Award?

- | | | | | | |
|----------------------------|----------------------------|----------------------------|----------------------------|----------------------------|----------------------------|
| <input type="radio"/> 1983 | <input type="radio"/> 1986 | <input type="radio"/> 1989 | <input type="radio"/> 1992 | <input type="radio"/> 1995 | <input type="radio"/> 1998 |
| <input type="radio"/> 1984 | <input type="radio"/> 1987 | <input type="radio"/> 1990 | <input type="radio"/> 1993 | <input type="radio"/> 1996 | <input type="radio"/> 1999 |
| <input type="radio"/> 1985 | <input type="radio"/> 1988 | <input type="radio"/> 1991 | <input type="radio"/> 1994 | <input type="radio"/> 1997 | |

2. Which best describes your **current primary** occupation? (Darken one oval.)

- a. Retired
- b. Currently not employed
- c. Employed in post-secondary education (e.g., college or university)
- d. Employed in K-12 education:
 - i. Employed as a K-12 classroom teacher, full or part-time; **SKIP TO QUESTION 7**
 - ii. Employed as a teacher on special assignment (without regular teaching responsibilities)
 - iii. Employed as a school principal
 - iv. Employed as a district-level mathematics supervisor
 - v. Employed in another K-12 education position, specify _____
- e. Employed outside of a formal education setting:
 - i. Occupation directly affects K-12 education
 - ii. Occupation does not directly affect K-12 education

If you selected d.i.(Employed as a K-12 classroom teacher, full or part-time), please skip to question 7. Otherwise, please proceed with question 3.

3. What is the last school year that you taught at the K-12 level?

- | | | | | | |
|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|
| <input type="radio"/> 1998-99 | <input type="radio"/> 1995-96 | <input type="radio"/> 1992-93 | <input type="radio"/> 1989-90 | <input type="radio"/> 1986-87 | <input type="radio"/> 1983-84 |
| <input type="radio"/> 1997-98 | <input type="radio"/> 1994-95 | <input type="radio"/> 1991-92 | <input type="radio"/> 1988-89 | <input type="radio"/> 1985-86 | |
| <input type="radio"/> 1996-97 | <input type="radio"/> 1993-94 | <input type="radio"/> 1990-91 | <input type="radio"/> 1987-88 | <input type="radio"/> 1984-85 | |

4. Briefly describe the key factors that contributed to your decision to leave the classroom. *Please avoid writing in the markings at the side of the page.*

5. Did the award contribute in any way to your decision to leave the classroom? Yes No

6. Do you have plans to return to classroom teaching? Yes No

7. To what extent did receipt of the award impact you in each of the following ways?
(Darken one oval on each line.)

Not at all To a great extent

a. It increased resources available for my teaching	1	2	3	4	5
b. It increased my opportunities to network with other teachers	1	2	3	4	5
c. It allowed more opportunities for my professional development	1	2	3	4	5
d. It increased the time spent away from my daily teaching assignment	1	2	3	4	5
e. It renewed my enthusiasm for teaching	1	2	3	4	5
f. It increased the respect I received from the school and community	1	2	3	4	5
g. It reduced the time that I had available for my teaching responsibilities	1	2	3	4	5

8. The monetary award allowed me to: (Darken all that apply.)

- a. Purchase technology for the school
- b. Plan and present professional development for colleagues
- c. Participate in professional development
- d. Sponsor a colleague to participate in professional development
- e. Purchase materials for my classroom
- f. Purchase materials for other classrooms
- g. Offer scholarships or grants to students
- h. Provide materials for parents and the community (e.g., information packets, workshops, special presentations)
- i. Contribute to school maintenance/renovation efforts
- j. Provide additional activities for students (e.g., field trips, camps, special classroom projects)
- k. Extend the award's impact by combining it with other sources of funds
- l. Other, please specify _____

9. In what ways, if any, was your award recognized by the local media? (Darken all that apply.)

- a. On a television news program
- b. In a radio news story
- c. In a local newspaper article
- d. In a school/district newsletter
- e. I received no local media recognition for winning the award.
- f. Other, please specify _____

10. Overall, to what extent has the award led to increased respect for you from:
(Darken one oval on each line.)

Not at all To a great extent

a. Your teaching colleagues	1	2	3	4	5
b. Your students	1	2	3	4	5
c. The parents of your students	1	2	3	4	5
d. The local community generally	1	2	3	4	5

11. In the past, awardees have reported a wide variety of responses from their colleagues. To what extent did your teaching colleagues view your receipt of the award as: (Darken one oval on each line.)

Not at all To a great extent

a. A well-deserved recognition of your excellence in teaching	1	2	3	4	5
b. A reward for simply being visible in the profession rather than excellent in teaching	1	2	3	4	5
c. Inspiration to apply for the Presidential Award or similar awards themselves	1	2	3	4	5
d. Money that could have been better spent on other things	1	2	3	4	5
e. A reflection of the excellence of the school as a whole	1	2	3	4	5

12. Which of the following activities were you engaged in during the specified times? (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. Supervising a student teacher	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. A formal mentoring or coaching arrangement with a new teacher	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. Serving as a grade-level/team leader	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
d. Serving as an informal resource in mathematics to other teachers in your school or district	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
e. Providing workshops on mathematics teaching to other teachers in your school or district	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
f. Serving on a school or district mathematics curriculum committee	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
g. Serving on a school or district mathematics textbook selection committee	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
h. Serving as the mathematics lead teacher or mathematics department chair	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

13. Indicate the professional organizations you were a member of during the specified times. (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. NCTM	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. State-level chapter of NCTM	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. Other mathematics-related professional organization(s), please specify: _____	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

14. Indicate the roles you have played in one or more of these professional organizations during the specified times. (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. Attended conferences	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. Served on organization committees	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. Presented at conferences	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

15. Which of the following have occurred during the specified times? (Darken one oval on each line in each column.)

	In the five years <u>prior</u> to the receipt of the award		Within the first five years <u>after</u> receiving the award	
a. I am pursuing or have received another academic degree	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
b. I am writing or have written a teaching-related journal article	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
c. I have been involved in writing a teaching-related book or textbook	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
d. I have hosted a radio or television program related to teaching	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
e. I have been involved in grant-writing or securing funds for education	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
f. I have been offered a job in the private sector	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No
g. I am teaching/have taught undergraduate/graduate courses at a college or university	<input type="radio"/> Yes	<input type="radio"/> No	<input type="radio"/> Yes	<input type="radio"/> No

Appendix B

Definitions of Teacher Composites

Teacher Preparation

- Teacher Preparedness to Use Standards-Based Teaching Practices
- Teacher Preparedness to Teach Students from Diverse Backgrounds
- Teacher Preparedness to Use Calculators/Computers
- Teacher Preparedness to Use the Internet
- Teacher Content Preparedness: Science
- Teacher Content Preparedness: Mathematics

Instructional Control

- Curriculum Control
- Pedagogy Control

Instructional Objectives

- Nature of Science/Mathematics Objectives
- Science Content Objectives
- Basic Mathematics Skills Objectives
- Mathematics Reasoning Objectives

Teaching Practices

- Use of Strategies to Develop Students' Abilities to Communicate Ideas
- Use of Traditional Teaching Practices
- Use of Laboratory Facilities
- Use of Projects/Extended Investigations
- Use of Computers
- Use of Calculators/Computers for Developing Concepts and Skills
- Use of Calculators/Computers for Investigations
- Use of Informal Assessment
- Use of Journals/Portfolios

Definitions of Teacher Composites

Composite definitions for the science and mathematics teacher questionnaire are presented below along with the item numbers from the respective questionnaires. Composites that are identical for the two subjects are presented in the same table; composites unique to a subject are presented in separate tables.

Teacher Preparation

These composites estimate the extent to which teachers feel prepared in both science and mathematics content and pedagogy.

Table B-1
Teacher Preparedness to Use Standards-Based Teaching Practices

	Science	Mathematics
Take students' prior understanding into account when planning curriculum and instruction.	Q3a	Q3a
Develop students' conceptual understanding of science/mathematics	Q3b	Q3b
Provide deeper coverage of fewer science/mathematics concepts	Q3c	Q3c
Make connections between science/mathematics and other disciplines	Q3d	Q3d
Lead a class of students using investigative strategies	Q3e	Q3e
Manage a class of students engaged in hands-on/project-based work	Q3f	Q3f
Have students work in cooperative learning groups	Q3g	Q3g
Listen/ask questions as students work in order to gauge their understanding	Q3h	Q3h
Use the textbook as a resource rather than the primary instructional tool	Q3i	Q3i
Teach groups that are heterogeneous in ability	Q3j	Q3j
Number of Items in Composite	10	10
Reliability (Cronbach's Coefficient Alpha)	0.88	0.86

Figure B-1

Figure B-2

Table B-2
Teacher Preparedness to Teach Students from Diverse Backgrounds

	Science	Mathematics
Recognize and respond to student cultural diversity	Q3l	Q3l
Encourage students' interest in science/mathematics	Q3m	Q3m
Encourage participation of females in science/mathematics	Q3n	Q3n
Encourage participation of minorities in science/mathematics	Q3o	Q3o
Number of Items in Composite	4	4
Reliability (Cronbach's Coefficient Alpha)	0.81	0.80

Figure B-3

Figure B-4

Table B-3
Teacher Preparedness to Use Calculators/Computers

	Science	Mathematics
Use calculators/computers for drill and practice	Q3q	Q3q
Use calculators/computers for science/mathematics learning games	Q3r	Q3r
Use calculators/computers to collect and/or analyze data	Q3s	Q3s
Use computers to demonstrate scientific principles*	Q3t	
Use calculators/computers to demonstrate mathematics principles*		Q3t
Use computers for laboratory simulations*	Q3u	
Use computers for simulations and applications*		Q3u
Number of Items in Composite	5	5
Reliability (Cronbach's Coefficient Alpha)	0.89	0.89

* The mathematics and science versions of this question are considered equivalent, worded appropriately for that discipline.

Table B-6
Teacher Content Preparedness: Mathematics

	General Mathematics	Advanced Mathematics
Numeration and number theory	Q15aa	
Computation	Q15ab	
Estimation	Q15ac	
Measurement	Q15ad	
PrB-Algebra	Q15ae	
Algebra		Q15af
Patterns and relationships	Q15ag	
Geometry and spatial sense	Q15ah	
Functions (including trigonometric functions) and prB-calculus concepts		Q15ai
Data collection and analysis		Q15aj
Probability		Q15ak
Statistics (e.g., hypothesis tests, curve fitting and regression)		Q15al
Topics from discrete mathematics (e.g., combinatorics, graph theory, recursion)		Q15am
Mathematical structures (e.g., vector spaces, groups, rings, fields)		Q15an
Calculus		Q15ao
Technology (calculators, computers) in support of mathematics		Q15ap
Number of Items in Composite	7	9
Reliability (Cronbach's Coefficient Alpha)	0.82	0.85

* Questions comprising these composites were asked of only those teachers in non-self-contained settings.

Figure B-16

Figure B-17

Instructional Control

These composites estimate the level of control teachers perceive having over curriculum and pedagogy decisions for their classrooms.

Table B-7
Curriculum Control

	Science	Mathematics
Determining course goals and objectives	Q31a	Q31a
Selecting textbooks/instructional programs	Q31b	Q31b
Selecting other instructional materials	Q31c	Q31c
Selecting content, topics, and skills to be taught	Q31d	Q31d
Selecting the sequence in which topics are covered	Q31e	Q31e
Number of Items in Composite	5	5
Reliability (Cronbach's Coefficient Alpha)	0.82	0.82

Figure B-18

Figure B-19

**Table B-8
Pedagogy Control**

	Science	Mathematics
Selecting the pace for covering topics	Q31g	Q31g
Determining the amount of homework to be assigned	Q31h	Q31h
Choosing criteria for grading students	Q31I	Q31i
Choosing tests for classroom assessment	Q31j	Q31j
Number of Items in Composite	4	4
Reliability (Cronbach's Coefficient Alpha)	0.84	0.80

Figure B-20

Figure B-21

Instructional Objectives

These composites estimate the amount of emphasis teachers place on various objectives.

Table B-9
Nature of Science/Mathematics Objectives

	Science	Mathematics
Learn to evaluate arguments based on scientific evidence	Q23f	
Understand the logical structure of mathematics		Q23i
Learn about the history and nature of science/mathematics	Q23j	Q23j
Learn how to communicate ideas in science effectively*	Q23g	
Learn how to explain ideas in mathematics effectively*		Q23k
Learn about the applications of science in business and industry*	Q23h	
Learn how to apply mathematics in business and industry*		Q23l
Learn about the relationship between science, technology, and society	Q23I	
Number of Items in Composite	5	4
Reliability (Cronbach's Coefficient Alpha)	0.84	0.73

* The mathematics and science versions of this question are considered equivalent, worded appropriately for that discipline.

Figure B-22

Figure B-23

Table B-10
Science Content Objectives

	Science
Learn basic science concepts	Q23b
Learn important terms and facts of science	Q23c
Learn science process/inquiry skills	Q23d
Prepare for further study in science	Q23e
Number of Items in Composite	4
Reliability (Cronbach's Coefficient Alpha)	0.60

Figure B-24

Table B-11
Basic Mathematics Skills Objectives

	Mathematics
Develop students' computational skills	Q23d
Learn to perform computations with speed and accuracy	Q23m
Prepare for standardized tests	Q23n
Number of Items in Composite	3
Reliability (Cronbach's Coefficient Alpha)	0.69

Figure B-25

Table B-12
Mathematics Reasoning Objectives

	Mathematics
Learn mathematical concepts	Q23b
Learn how to solve problems	Q23e
Learn to reason mathematically	Q23f
Learn how mathematics ideas connect with one another	Q23g
Number of Items in Composite	4
Reliability (Cronbach's Coefficient Alpha)	0.75

Figure B-26

Teaching Practices

These composites estimate the extent to which teachers use a variety of teaching practices and instructional technologies/facilities.

Table B-13
Use of Strategies to Develop Students' Abilities to Communicate Ideas

	Science	Mathematics
Pose open-ended questions	Q24b	Q24b
Engage the whole class in discussions	Q24c	
Require students to supply evidence to support their claims*	Q24d	
Require student to explain their reasoning when giving an answer*		Q24d
Ask students to explain concepts to one another	Q24e	Q24e
Ask students to consider alternative explanations *	Q24f	
Ask students to consider alternative methods for solutions*		Q24f
Ask students to use multiple representations (e.g., numeric, graphic, geometric, etc.)		Q24g
Help students see connections between science/mathematics and other disciplines	Q24h	Q24h
Number of Items in Composite	6	6
Reliability (Cronbach's Coefficient Alpha)	0.79	0.77

* The mathematics and science versions of this question are considered equivalent, worded appropriately for that discipline.

Figure B-27

Figure B-28

Table B-14
Use of Traditional Teaching Practices

	Science	Mathematics
Introduce content through formal presentations	Q24a	Q24a
Assign science/mathematics homework	Q24I	Q24j
Listen and take notes during presentation by teacher	Q25a	Q25a
Read from a science/mathematics textbook in class	Q25d	Q25c
Practice routine computations/algorithms		Q25f
Review homework/worksheet assignments		Q25g
Answer textbook or worksheet questions	Q25j	Q25k
Review student homework	Q27f	Q27f
Give predominantly short-answer tests (e.g., multiple choice, true/false, fill in the blank)	Q27k	
Number of Items in Composite	7	8
Reliability (Cronbach's Coefficient Alpha)	0.78	0.74

Figure B-29

Figure B-30

Table B-15
Use of Laboratory Facilities

	Science
Use running water in labs/classrooms	Q28l3
Use electric outlets in labs/classrooms	Q28m3
Use gas for burners in labs/classrooms	Q28n3
Use hoods or air hoses in labs/classrooms	Q28o3
Number of Items in Composite	4
Reliability (Cronbach's Coefficient Alpha)	0.80

Figure B-31

Table B-16
Use of Projects/Extended Investigations

	Science
Design or implement their own investigation	Q25h
Participate in field work	Q25i
Prepare written science reports	Q25m
Make formal presentations to the rest of the class	Q25n
Work on extended science investigations or projects (a week or more in duration)	Q25o
Have students do long-term science projects	Q27i
Have students present their work to the class	Q27j
Grade student work on open-ended and/or laboratory tasks using defined criteria (e.g., a scoring rubric)	Q27m
Have students assess each other (peer evaluation)	Q27n
Number of Items in Composite	9
Reliability (Cronbach's Coefficient Alpha)	0.85

Figure B-32

Table B-17
Use of Computers

	Science
Use computers as a tool (e.g., spreadsheets, data analysis)	Q25p
Do drill and practice	Q26a
Demonstrate scientific principles	Q26b
Play science learning games	Q26c
Do laboratory simulations	Q26d
Collect data using sensors or probes	Q26e
Retrieve or exchange data	Q26f
Solve problems using simulations	Q26g
Take a test or quiz	Q26h
Number of Items in Composite	9
Reliability (Cronbach's Coefficient Alpha)	0.91

Figure B-33

Table B-18
Use of Calculators/Computers for Developing Concepts and Skills

	Mathematics
Use calculators or computers for learning or practicing skills	Q25p
Use calculators or computers to develop conceptual understanding	Q25q
Do drill and practice	Q26a
Demonstrate mathematics principles	Q26b
Take a test or quiz	Q26h
Use graphing calculators	Q28g3
Number of Items in Composite	6
Reliability (Cronbach's Coefficient Alpha)	0.86

Figure B-34

Table B-19
Use of Calculators/Computers for Investigations

	Mathematics
Record, represent, and/or analyze data	Q25l
Use calculators or computers as a tool (e.g., spreadsheets, data analysis)	Q25r
Do simulations	Q26d
Collect data using sensors or probes	Q26e
Retrieve or exchange data	Q26f
Solve problems using simulations	Q26g
Number of Items in Composite	6
Reliability (Cronbach's Coefficient Alpha)	0.85

Figure B-35

Table B-20
Use of Informal Assessment

	Science	Mathematics
Observe students and ask questions as they work individually	Q27b	Q27b
Observe students and ask questions as they work in small groups	Q27c	Q27c
Ask students questions during large group discussions	Q27d	Q27d
Use assessments embedded in class activities to see if students are “getting it”	Q27e	Q27e
Number of Items in Composite	4	4
Reliability (Cronbach’s Coefficient Alpha)	0.79	0.69

Figure B-36

Figure B-37

Table B-21
Use of Journals/Portfolios

	Science	Mathematics
Read and comment on the reflections students have written, e.g., in their journals	Q24j	Q24k
Write reflections (e.g., in a journal)	Q25l	Q25m
Review student notebooks/journals	Q27g	Q27g
Review student portfolios	Q27h	Q27h
Number of Items in Composite	4	4
Reliability (Cronbach's Coefficient Alpha)	0.82	0.83
